NEW HORIZON COLLEGE OF ENGINEERING

VISION

To emerge as an institute of eminence in the fields of engineering, technology and management in serving the industry and the nation by empowering students with a high degree of technical, managerial and practical competence.

MISSION

To strengthen the theoretical, practical and ethical dimensions of the learning process by fostering a culture of research and innovation among faculty members and students.

To encourage long-term interaction between the academia and industry through their involvement in the design of curriculum and its hands-on implementation.

To strengthen and mould students in professional, ethical, social and environmental dimensions by encouraging participation in co-curricular and extracurricular activities.

QUALITY POLICY

To provide educational services of the highest quality both curricular and co-curricular to enable students integrate skills and serve the industry and society equally well at global level.

VALUES

- Academic Freedom
- Integrity
- Inclusiveness
- Innovation
- Professionalism
- Social Responsibility

DEPARTMENT OF MCA

VISION

To emerge as a department of eminence in the field of Computer Applications in serving the Information Technology Industry and the nation by empowering students with a high degree of technical, managerial and practical competence.

MISSION

To strengthen the theoretical, practical and ethical aspects of the learning while inculcating a culture of research, innovation and practical applications amongst faculty and students.

To encourage long-term interactions between the department and the IT Industry through rich involvement of the Industry in the design of the curriculum and its hands-on implementation.

To strengthen and mould students in professional, ethical, social and environmental dimensions by encouraging participation in co-curricular and extracurricular activities.

QUALITY POLICY

To provide services of the highest quality both curricular and co-curricular, so that our students can integrate their skills and serve the industry and society equally well at the global level.

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

- PEO1** Excel in the field of Computer Applications and contribute to academia, industry and research.
- PEO2** Deliver software solutions that are socially relevant and adopt quickly to emerging technologies.
- PEO3** Demonstrate professional behavior by understanding ethical and communication skills to engage in lifelong learning.

PROGRAM SPECIFIC OUTCOME (PSOs)

PSO1

Ability to design, develop, implement computer programs and apply the knowledge in various domains to identify research gaps and to provide solutions to new ideas and innovations.

PSO2

Work and communicate effectively with professionals in various fields and pursue lifelong professional development in computing.

PEO to Mission Statement Mapping

Correlation: 3-High, 2-Medium, 1-Low

Mission Statements	PEO1	PEO2	PEO3
To strengthen the theoretical, practical and ethical aspects of the learning while inculcating a culture of research, innovation and practical applications amongst faculty and students.	3	3	3
To encourage long-term interactions between the department and the IT Industry through rich involvement of the Industry in the design of the curriculum and its hands-on implementation.	3	2	3
To strengthen and mould students in professional, ethical, social and environmental dimensions by encouraging participation in co-curricular and extra-curricular activities.	3	3	3

Program Outcomes (PO) with Graduate Attributes

PROGRAMME OUTCOMES (POs)

- PO1 Computational Knowledge:** Apply computing knowledge, mathematical knowledge and domain knowledge to create and develop new models for real world applications.
- PO2 Problem Analysis:** Identify, formulate, review research literature and analyze complex problems using principles of mathematics, computing sciences and relevant domains.
- PO3 Design / Development of Solutions:** Design, implement, test and maintain solutions for systems, components or processes that meet specific needs with consideration for public health safety, societal and environmental issues.
- PO4 Conduct investigations of complex Computing problems:** Use Research-based knowledge to analyze and interpret data to obtain viable conclusions.
- PO5 Modern Tool Usage:** Use modern tools, techniques and skills to solve complex and critical computing problems with an understanding of their limitations.
- PO6 Professional Ethics:** Understand and apply ethical principles, cyber regulations and commit to professional computing practice and responsibilities.
- PO7 Life-long Learning:** Recognize the importance of self-learning for continual development as a computing professional.
- PO8 Project management and finance:** Demonstrate the management principles for managing projects as an individual, as a member and as a leader in a team under multidisciplinary environments.
- PO9 Communication Efficacy:** Recognize the importance of communication within the computing community and the society at large.

PO10 Societal and Environmental Concern: Understand and assess the local and global influence of software solutions and responsibilities related to professional computing practice.

PO11 Individual and Team Work: Deliver effectively as an individual and as a member or leader in diverse teams and in multidisciplinary environments.

PO12 Innovation and Entrepreneurship: Adopt standardized computer application practices with innovative ideas to succeed as an employee or an entrepreneur.

Mapping of POs to PEOs

PO's	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
PEO1	3	3	3	3	3	2	1	3	2	2	3	3
PEO2	3	3	3	2	3	2	1	3	2	3	3	3
PEO3	2	2	3	2	2	3	3	2	2	3	2	2

Correlation: 3- High, 2-Medium, 1-Low

NEW HORIZON COLLEGE OF ENGINEERING

Autonomous College Permanently Affiliated to VTU, Approved by AICTE & UGC
Accredited by **NAAC** with 'A' Grade. Accredited by NBA

The Trust is a Recipient of Prestigious Rajyotsava State Award 2012 Conferred by the Government of Karnataka.
Awarded Outstanding Technical Education Institute in Karnataka.

THIRD SEMESTER

MCA SYLLABUS

2-YEAR PROGRAM

DESIGN AND ANALYSIS OF ALGORITHMS

Course Code : 20MCA31A

Credits : 04

L:T:P:S : 4:0:0:0

CIE Marks : 50

Exam Hours : 3

SEE Marks : 50

Course Outcomes: At the end of the course, the student will be able to:

CO1	Summarize the paradigms and approaches used to design and analyze algorithms by categorizing problems based on the popular domains.
CO2	Discuss Brute Force, Divide & conquer algorithms and measure their performance.
CO3	Classify the different Decrease and conquer algorithms and discuss space and time tradeoffs technique.
CO4	Characterize the features of various graphical problems with the help of a suitable technique.
CO5	Evaluate the limitations of algorithm by categorizing the problems such as P, NP or NP Complete.
CO6	Apply Backtracking and Branch & Bound techniques to solve different problems and analyze their performance.

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	2	3	3	-	-	-		-	-	-	-	-	3	3
CO2	2	3	3	2	-	-	2	-	-	-	2	-	3	3
CO3	2	3	3	2	-	-	2	-	-	-	2	-	3	3
CO4	2	3	3	2	-	-	2	-	-	-	2	-	3	3
CO5	2	3	3	-	-	-	2	-	-	-	2	-	3	3
CO6	2	3	3	-	-	-	2	-	-	-	2	-	3	3

SYLLABUS			
Module	Contents of the Module	Hours	COs
1	<p>Introduction: Notion of Algorithm, Fundamentals of Algorithmic Problem Solving, Important Problem Types, Basics of data structures.</p> <p>Fundamentals of the Analysis of Algorithm Efficiency: Analysis Framework, Asymptotic Notations and Basic efficiency classes, Mathematical analysis of Recursive and Non-recursive algorithms, Examples.</p>	9	CO1
2	<p>Brute Force: Selection Sort, Bubble sort, String Matching, Exhaustive Search.</p> <p>Divide and Conquer: Merge sort, Quick sort, Binary Search, Binary tree traversals and related properties, Multiplication of large integers.</p>	9	CO2
3	<p>Decrease and Conquer: Insertion Sort, Depth-First and Breadth-First Search, Topological sorting, Algorithms for Generating Combinatorial Objects, Decrease by a constant factor algorithms.</p> <p>Space and Time Tradeoffs: Sorting by Counting, Input Enhancement in String Matching using Horspool's Algorithm, Hashing, B-Trees.</p>	9	CO3
4	<p>Dynamic Programming: Computing a binomial coefficient, Warshall's and Floyd's algorithms, Knapsack Problem.</p> <p>Greedy Technique: Prim's Algorithm, Kruskal's Algorithm, Dijkstra's Algorithm, Huffman Trees.</p>	9	CO4
5	<p>Limitations of algorithm power: Introduction, Lower bound arguments, Decision trees, P, NP and NP-complete problems.</p> <p>Coping with the limitations of algorithm power: Backtracking, n-queens problem, Hamiltonian Circuit problem, Subset-Sum problem. Branch-and-Bound - Knapsack problem, Travelling Salesman Problem, Assignment problem.</p>	9	CO5 CO6

MACHINE LEARNING TECHNIQUES

Course Code : 20MCA32A **Credits** : 04

L:T:P:S : 4:0:0:0 **CIE Marks** : 50

Exam Hours : 3 **SEE Marks** : 50

Course Outcomes: At the end of the course, the student will be able to:

CO1	Discuss and identify the practical applications of Machine Learning (ML) and types of ML approaches.
CO2	Apply suitable ML algorithms using standard datasets.
CO3	Analyze the usage of supervised and unsupervised ML algorithms.
CO4	Develop simple scripts using R tool.
CO5	Evaluate the performance of classification and clustering algorithms using standard datasets.
CO6	Construct the ML algorithms using R tool.

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	1	2	-	-	-	-	2	-	-	1	-	1	3	3

DATA SCIENCE

Course Code : 20MCA331A

Credits : 04

L:T:P:S : 4:0:0:0

CIE Marks : 50

Exam Hours : 3

SEE Marks : 50

Course Outcomes: At the end of the course, the student will be able to:

CO1	Understand the basics of Data Science (DS) and programming packages, stages in data pre-processing.
CO2	Use basic mathematics in DS applications.
CO3	Apply advanced statistics in DS applications.
CO4	Illustrate data manipulation concepts in Python.
CO5	Identify visualization of categorical and numerical data using software packages.
CO6	Formulate the customization of visualization outputs.

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	1	-	-	2	-	-	-	-	-	-	-	-	3	3
CO2	3	2	1	-	-	-	-	-	-	-	-	2	3	3
CO3	2	2	-	2	-	-	-	2	-	-	-	-	3	3

CO5	1	2	1	-	2	-	-	-	-	-	-	-	3	3
CO6	1	2	1	1	2	-	-	-	-	-	-	-	3	3

SYLLABUS			
Module	Contents of the Module	Hours	COs
1	Data Science Introduction: Basic terminologies, Venn diagram, Programming – Prebuilt Python modules: pandas, sci-kit learn, seaborn, numpy/scipy, requests (to mine data from the web), Beautiful soup (for web-html parsing), Types of Data – Structured versus Unstructured, Quantitative versus Qualitative data, Data pre-processing – example programs, Four levels of data and mathematical operations, other measures on all levels of data, Five Steps of DS and Basics of data exploration, Elementary case studies.	9	CO1
2	Basic Mathematics for data science: Vectors and Matrices, Arithmetic symbols, Graphs, Logarithms/exponents and Set theory. Linear Algebra – Matrix multiplication. Introduction to Probability: Basic definitions, Bayesian versus Frequentist, Compound events, Rules of probability, Advanced Probability – Bayes theorem, Applications, Random variables.	9	CO2
3	Basic Statistics: Statistics, Obtaining sample data, Sampling data, Statistical measures – center, variation and relativeness. Advanced Statistics: Sampling distributions, Confidence levels, Hypothesis tests – Conducting a test, One sample t-tests, Type-I and Type-II errors. Hypothesis test for categorical variables – Chi-Square goodness of fit test, Chi-Square test for association/independence.	9	CO3
4	High Performance Packages: Introduction to Numpy – Data types in Python, Basics of Numpy arrays, Computation on Numpy arrays – Universal functions, Aggregations, Broadcasting, Comparisons, Masks and Boolean logic, Fancy Indexing, Sorting arrays, Numpy's structured arrays. Data manipulation: Pandas objects, Data Indexing and selection, Operating on data in pandas, Handling missing data, Hierarchical Indexing, concat and append, merge and join, aggregation and grouping, pivot tables, vectorized string operations, working with time series, high-performance pandas – eval() and query().	9	CO4

5	Visualization Packages: Introduction to Matplotlib – Importing, Setting styles, Displaying plots – Simple line plots, scatter plots. Visualizing errors, Density and Contour plots, Histograms, Binnings and Density, Customizing plot legends, Customizing colorbars, Multiple subplots, Text and Annotation, 3D plotting in Matplotlib.	9	CO5 CO6
----------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------	--------------------

DEEP LEARNING

Course Code : 20MCA332A

Credits : 04

L:T:P:S : 4:0:0:0

CIE Marks : 50

Exam Hours : 3

SEE Marks : 50

Course Outcomes: At the end of the course, the student will be able to:

CO1	Understand the applied mathematical concepts in the basics of machine learning.
CO2	Discuss Feedforward networks and build deep learning models.
CO3	Design deep learning models for improved performance over traditional models.
CO4	Apply deep learning concepts in research for advanced feature engineering applications.
CO5	Use deep learning concepts in advanced research problems.
CO6	Develop deep learning models across vivid domain applications.

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

REINFORCEMENT LEARNING

Course Code : 20MCA333A Credits : 04

L:T:P:S : 4:0:0:0 CIE Marks : 50

Exam Hours : 3 SEE Marks : 50

Course Outcomes: At the end of the course, the student will be able to:

CO1	Discuss the fundamental ideas of modern Reinforcement Learning (RL).
CO2	Distinguish between on-policy and off-policy by solving problems using dynamic programming techniques and Monte-Carlo methods.
CO3	Predict the optimal values for a given signal.
CO4	Develop an intuitive learning for the prediction and approximation of RL.
CO5	Evaluate the predictions and hypothesis of Neuroscience.
CO6	Analyse real-time applications and case studies in RL.

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

ARTIFICIAL INTELLIGENCE

Course Code : 20MCA335A

Credits : 04

L:T:P:S : 4:0:0:0

CIE Marks : 50

Exam Hours : 3

SEE Marks : 50

Course Outcomes: At the end of the course, the student will be able to:

CO1	Discuss the basic concepts of Artificial Intelligence (AI) and searching techniques.
CO2	Summarize different logic to represent knowledge, reasoning patterns to derive the proof.
CO3	Illustrate statistical reasoning for incomplete and uncertain Information using Bayes theorem.
CO4	Examine different AI techniques for planning and learning.
CO5	Demonstrate the fundamentals of conceptual dependency, game playing and design scripts.
CO6	Evaluate different phases of natural language processing and connectionist models.

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

SYLLABUS			
Module	Contents of the Module	Hours	COs
1	Grid Fundamentals: Grid computing, Benefits: Exploiting under-utilized resources, Parallel CPU capacity, Virtual resources and virtual organizations for collaboration, Access to additional resources, Resource balancing, Reliability and management. Grid terms and concepts – Types of resources, Jobs and applications, Scheduling, reservation and scavenging, Grid software components. Grid user roles – A user's perspective – Enrolling, Logging, Querying, configuring, monitoring and reserving resources, Using a grid: Planning, Installation, Managing enrolment, Certificate authority and resource management.	9	CO1
2	Grid architecture considerations: Standards for grid environments – OGSA, OGSI, OGSA-DAI, GridFTP, WSRF, Web services related standards. Application considerations: General application considerations, CPU-intensive application considerations, Data considerations. Security: Introduction to grid security – Grid security requirements, CPU-intensive application considerations. Design – Building Grid architecture, Grid architecture models, Grid topologies, Phases and activities, A conceptual architecture, Web services resource framework – Resource state management using Grid services, WSRF fundamentals, WS-Resource Framework specifications, WSRF references.	9	CO2
3	Creating a grid environment with Globus Toolkit 4: Globus Toolkit 4 components – Common runtime components, Security components, Data Management components, Monitoring and Discovery services, Execution management. Globus toolkit 4 installations and configuration, Grid demonstration application, Case study on IBM software portfolio.	9	CO3

4	Cluster Computing: Introduction to Cluster Computing, Scalable Parallel Computer Architectures, Cluster Computer and its Architecture, Classifications, Components for Clusters, Cluster Middleware and Single System Image, Resource Management and Scheduling, Programming Environments and Tools, Applications, Representative Cluster Systems, Heterogeneous Clusters, Security, Resource Sharing, Locality, Dependability, Cluster Architectures, Detecting and Masking Faults, Recovering from Faults, Condor, Evolution of Meta-computing.	9	CO4
5	Load Sharing and Balancing: Evolution, Job and Resource Management Systems, State-of-the-Art in RMS and Job, Rigid Jobs with Process Migration, Communication-Based Scheduling, Batch Scheduling, Fault Tolerance, Scheduling Problem for Network Computing, Algorithm - ISH, MCP and ETF, Dynamic Load Balancing, Mapping and Scheduling, Task Granularity and Partitioning, Static and Dynamic Scheduling.	9	CO5 CO6

SOCIAL MEDIA ANALYTICS

Course Code : 20MCA344A

Credits : 04

L:T:P:S : 4:0:0:0

CIE Marks : 50

Exam Hours : 3

SEE Marks : 50

Course Outcomes: At the end of the course, the student will be able to:

CO1	Identify the subset of available data to focus on analysis.
CO2	Demonstrate the activities that assist in transforming raw data into insights.
CO3	Analyze various perspectives of insights to derive higher accuracy.
CO4	Evaluate the information interpretation as a social analytic process.
CO5	Organize information gathered from consumer to filter & find right data.
CO6	Formulate the common visualizations techniques.

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	-	-	-	-	-	1	-	-	-	-	-	1	3	3
CO2	-	-	-	-	-	-	-	-	-	-	-	1	3	3
CO3	-	3	-	2	-	-	-	-	-	-	-	1	3	3
CO4	-	2	-	2	-	1	-	-	-	-	1	1	3	3

CO6	2	1	-	1	-	-	-	-	-	-	1	1	3	3

SYLLABUS			
Module	Contents of the Module	Hours	COs
1	Data Identification: Data, Subset of content, Attributes of data, Regular expressions and right subset of people, Predictive versus Descriptive, Sentiment, Structured data versus Unstructured data, Big data and Identifying data in social media outlets.	9	CO1
2	Data Analysis - I: Four dimensions of analysis taxonomy, Domain of analysis, Velocity of data, Validating the hypothesis, Discovering themes and topics, Using iterative methods. Stream computing, IBM Infosphere streams, SPL applications, Directed graphs, SSM examples, Value derived from a conference using real-time analytics.	9	CO2
3	Data Analysis - II: Ad-Hoc analysis, Example of Ad-Hoc analysis, Data Integrity, Responding to leads identified in social media, Support for deep analysis in analytics software. Enterprise Social Network: Social collaboration, Memory of organization, Enterprise graph and details of implementation.	9	CO3
4	Information Interpretation: Finding the right data, Communication, Choosing filter words, Customizing and Modifying tools, Using right tools, Analyzing consumer reaction during hurricane study.	9	CO4
5	Visualization as an aid to analytics: Common visualizations – Pie, Bar, Line, Scatter plots. Common pitfalls – Information overload, Unintended consequences of using 3D, Using colour, Visually representing unstructured data. Case study: IBM Amplify - Data Identification, Data Analysis and Information Interpretation and conclusions.	9	CO5 CO6

AUGMENTED REALITY AND VIRTUAL REALITY

Course Code : 20MCA345A

Credits : 04

L:T:P:S : 4:0:0:0

CIE Marks : 50

Exam Hours : 3

SEE Marks : 50

Course Outcomes: At the end of the course, the student will be able to:

CO1	Discuss the design modalities across digital realities.
CO2	Demonstrate the making of 3D Art.
CO3	Examine the augmented and virtual reality toolkits.
CO4	Design ML visualization in augmented reality (AR) and virtual reality (VR).
CO5	Develop an AR/VR health ecosystem.
CO6	Analyze the case studies in AR/VR.

Mapping of Course Outcomes to Program Outcomes:

CO6	2	2	2	-	2	-	-	3	-	-	2	1	3	3

SYLLABUS			
Module	Contents of the Module	Hours	COs
1	<p>INTRODUCTION TO ANDROID: Android architecture, Android Studio-Project Structure, User Interface, Gradle build system, Debug and profile tools, Android Emulator, AVD in Android Studio, Hardware device, Basic Building blocks – Activities, Services, Broadcast Receivers & Content providers, UI Components- Views & notifications, Components for communication - Intents & Intent Filters.</p> <p>Hands-On: Using Android SDK display Hello world in android.</p>	9	CO1
2	<p>APPLICATION STRUCTURE AND BASIC UI DESIGN: Activity, Lifecycle, View, View groups, Layouts, Basic controls of screen- Managing orientation, Using basic view- Textview, Button, Edit text box, checkbox and radio button, Event handling for views, Recycler view, Adapter and view holder, Alert dialog, Toast, Datepicker, Timepicker.</p> <p>Hands-On:</p> <ol style="list-style-type: none"> 1. Design and implement a single screen app that displays information about a small business. eg. Restaurant, Book shop etc. Your design must include: <ul style="list-style-type: none"> • Business name • Photo of business • Contact information 2. Design and develop a Mobile App for smart phones - Unit Converter using Android Studio. 3. Design and develop a Mobile App for smart phones - Currency Converter. 	9	CO2

3	<p>INTENTS, SERVICE AND NOTIFICATION: Concept of Intents, Implicit and Explicit intent, Service, Overview of services in Android, Implementing a Service, Service lifecycle, Broadcast Receiver, Notification.</p> <p>Hands-On:</p> <ol style="list-style-type: none"> 1. Design an app for Tourist spot with the following three activities: Welcome page, display highlights of tourist spot and webpage of the tourist spot. 2. Design Android app “play music” in the background. 	9	CO3
4	<p>DATA STORAGE AND INTER PROCESS COMMUNICATION: Content Provider, Shared Preferences, Preferences activity, File access, SQLite database, Threads, AsyncTask.</p> <p>Hands-On:</p> <ol style="list-style-type: none"> 1. Design and develop a Mobile App “The Expense Manager” for smart phones using Android. The app should store all the expenses in a file. 2. Design and develop Health Monitoring App using Android. The app will store the blood pressure, blood group and glucose level of a patient in SQLite database. 	9	CO4
5	<p>ADVANCED ANDROID APP DEPLOYMENT: Sending SMS using app, Building apps with Location-based services and Google maps, Building app with Camera, Preparing for publishing – Signing & Versioning of apps, Using Google Play to distribute & monetize, Best practices for security and privacy.</p> <p>Hands-On:</p> <ol style="list-style-type: none"> 1. Develop an Android app to display Map of your college locality. 2. Develop an Android app to alert SMS to one given phone number. 	9	CO5 CO6

Text Books:

1. Learn Android Studio 4, Efficient Java-Based Android Apps Development, Ted Hagos, Apress, 2020, ISBN: 978-1-484-259368.
2. Professional Android2 Application Development, RetoMeier, Wiley, 1st Edition, 2012, ISBN: 9788126525898.

SYLLABUS			
Module	Contents of the Module	Hours	COs
1	Introduction to OpenCV: Setting up OpenCV, compiled versus precompiled library, Configuring OpenCV, Building and Installing the library, API concepts and basic data types, Reading/writing images and videos, Reading and Playing a video file, Live input from a camera.	9	CO1
2	Graphical User Interfaces: Highgui module, text and drawing, selecting regions, using Qt-based functions. Image Processing: pixel-level access and common operations, Image histogram, Brightness and contrast modeling, Histogram matching and LUT, Conversion from RGB to colour spaces, Filtering with the retina model.	9	CO2
3	Arithmetic and geometrical transforms: Arithmetic transform, Geometrical transforms, Image Segmentation, Thresholding, Contours and connected components, Flood fill, Watershed segmentation, Grabcut.	9	CO3
4	Focusing on the Interesting 2D features: Interest points, Feature detectors, Feature descriptor extractors, Descriptor matches, Matching the SURF descriptors, Matching the AKAZE descriptors. Object detection: Definition, Detecting objects with OpenCV, Cascades: using Object detection with OpenCV, Training your own cascade, Latent SVM, Scene text detection.	9	CO4
5	Motion: Reading video sequences, The Lucas-Kanade optical flow, The Gunnar-Farnback optical flow, The mean-shift tracker, The Camshift tracker, The motion templates, The background subtraction technique, Image alignment. Machine Learning: KNN classifier, Radom forest classifier and SVM. GPU: Definition, Setting up OpenCV with CUDA, GPU based program.	9	CO5 CO6

PYTHON PROGRAMMING LAB

Course Code : 20MCAL36A

Credits : 1.5

L:T:P:S : 0:0:1.5:0

CIE Marks : 25

Exam Hours : 3

SEE Marks : 25

Course Outcomes: At the end of the course, the student will be able to:

CO1	Demonstrate python programs using strings and control structures.
CO2	Design python programs using Dictionary, Tuple and List structures.
CO3	Construct python programs for creating functions, classes, pattern matching and handling exceptions.
CO4	Develop machine learning programs for classification algorithms.
CO5	Develop machine learning programs for clustering algorithms.
CO6	Design machine learning programs for regression analysis methods.

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

BIGDATA ANALYTICS LAB

Course Code : 20MCAL37A **Credits** : 1.5

L:T:P:S : 0:0:1.5:0 **CIE Marks** : 25

Exam Hours : 3 **SEE Marks** : 25

Course Outcomes: At the end of the course, the student will be able to:

CO1	Discuss the fundamental concepts of big data analytics.
CO2	Apply various techniques for designing and mining data streams.
CO3	Analyze big data using data sources and its log files.
CO4	Design applications using Map Reduce Concepts.
CO5	Use DML operations to visualize in Hadoop.
CO6	Explore to demonstrate the Hadoop ecosystem as a real-time middleware.

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	1	-	-	-	-	-	-	-	-	-	-	1	3	3

MINI PROJECT (IOT/CLOUD/PYTHON/ML)

Course Code : 20MCA38A **Credits** : 2

L:T:P:S : 0:0:2:0 **CIE Marks** : 25

Exam Hours : 3 **SEE Marks** : 25

Course Outcomes: At the end of the course, the student will be able to:

CO1	Recall the concepts learnt in IOT/CLOUD/PYTHON/ML courses.
CO2	Illustrate a suitable case study for the domain of applications to be developed.
CO3	Apply the required tools and techniques for software development.
CO4	Examine the requirements and transform them to a software module.
CO5	Assess the valid arguments in case study against the software module developed.
CO6	Formulate the test cases and strategies for the software module developed.

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	2	-	-	-	-	-	-	-	-	1	1	3	3
CO2	3	3	3	-	-	-	-	-	-	-	1	1	3	3
CO3	3	3	3	2	1	-	3	1	-	-	1	1	3	3
CO4	3	3	3	2	1	-	3	1	-	-	1	1	3	3
CO5	3	3	3	2	1	-	3	1	-	-	1	1	3	3
CO6	3	3	3	2	1	-	3	1	-	-	1	1	3	3

MINI PROJECT WORK:

This mini project is based on IOT/CLOUD/PYTHON/ML concepts. The sample project titles are shown below:

1. Automated Plant Watering System
2. Raspberry Pi Arduino Intelligent Tea Sensor
3. Lightweight Arduino GSM Mobile Phone
4. Automated Cocktail Drink Machine
5. Campus Automation Using Cloud Computing
6. Detection of Data Leaks Using SQL Injection Prevention
7. Cloud-Based Student Information Chatbot
8. Cloud-Based Bus Ticket System
9. Android Offloading Over Cloud
10. Personal Cloud with Raspberry Pi
11. Remote Monitoring using IoT
12. Text Classification for Business Analytics
13. Encrypted Cloud Storage
14. Sentiment Analysis of Product Reviews
15. Stock Prices Prediction
16. Sales Forecasting
17. Movie Ticket Pricing Prediction
18. Music Recommendation
19. Handwritten Digit Classification
20. Fake News Detection

Project must be done individually.

Final evaluation will be done by: Project Demonstration.

The marks of the mini project would be given on the basis of performance in CIE and SEE.

Mini Project Work Evaluation: (20MCA38A)

During project work, the evaluation process will be divided into number of phases to assess the continuous progress (Minimum three phases).

- ❖ The project guides and project coordinator follows rubrics, which is set by the Department for evaluation and then submitted to the head of department.
- ❖ Each internal guide will verify the statement of project and literature of works and implementation details. The department will encourage students to make publications in standard conferences/journals.

Rubrics for Mini Project Evaluation CIE& SEE:

Review #	Agenda	Assessment	Review Assessment Weightage	Overall Weightage
Review 1	Project Synopsis Evaluation	Rubrics1	25	25 (Avg of R1, R2, R3)
Review 2	Mid-Term Project Evaluation	Rubrics2	25	
Review 3	Final Internal Project Evaluation	Rubrics3	25	
Final Project Viva-Voce	End-Semester Project Evaluation		25	25
Total				50

FOURTH SEMESTER

MCA SYLLABUS

2-YEAR PROGRAM

INDUSTRY INTERNSHIP / PROJECT WORK

Course Code : 20MCA41A

Credits : 21

L:T:P:S : 0:0:21:0

CIE Marks : 150

Exam Hours : 3

SEE Marks : 150

Course Outcomes: At the end of the Internship/Project, the student will be able to:

CO1	Identify skills to work and gain knowledge in the software industry.
CO2	Map theoretical knowledge with practical knowledge.
CO3	Analyze real-time experience and develop code for projects.
CO4	Demonstrate the strengths in tune with the current industry demands.
CO5	Enhance teamwork skills.
CO6	Demonstrate communication skills required to deliver effective technical presentations.

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	-	1	1	2	2	1	-	-	1	1	-	3	3
CO2	3	-	3	1	2	2	1	-	-	1	1	-	3	3
CO3	3	3	3	1	2	2	1	2	-	1	1	1	3	3
CO4	3	3	3	1	2	2	1	2	-	1	1	1	3	3
CO5	3	3	3	1	2	2	1	-	-	1	3	-	3	3
CO6	3	3	3	1	2	2	1	-	3	1	1	-	3	3

General Guidelines:

1. The project work must be done individually in a software firm or R & D Institution.
2. Project should be high quality simulated application project work, for a total duration of 4-6 months.
3. Project work may be application-oriented or research-oriented as per student interest. Therefore, the project reports will vary depending on the type of project undertaken.
4. The student is expected to submit his/her synopsis within a week of time from the commencement of IV semester.
5. An Internal guide will be allocated for each student.
6. The status of project progress must be updated with the internal guide every week.
7. Presentations should be given during subsequent project reviews.
8. Project verification at the place of project work must be mandatory by the external guide, for completion of the work.
9. Project report must be checked for plagiarism, similarity index must be less than or equal to 20%.
10. The CIE of the project work will be evaluated based on the well-defined rubrics during subsequent project reviews.
11. The project report will be evaluated by both internal and external guide assigned by COE.
12. Final presentation of the project report and viva-voce will form the SEE.
13. If project report is not as per the format and not a *high quality simulated application project*, external examiners will have every right to reject the project.

MCA 4th SEMESTER PROJECT REPORT

The format of the report shall include the following:

- A bonafide certificate duly signed by the internal guide, HoD and Principal.
- An undertaking from the student that the work is carried out independently by him/her.
- A Project completion certificate from the organization.
- Acknowledgement.

The sample contents of application project must have the following chapters:

- Abstract
- Introduction
- SRS
- Project Plan
- Analysis and Design
- Implementation (algorithm/coding/screenshots)
- Testing
- Business Model
- Impact on societal/environmental/health/ others
- Conclusion and Future enhancements
- Bibliographic references

Sample contents of research work includes the following chapters:

- Title, Abstract, Keywords
- Introduction
- Literature Survey
- Objectives of Investigation
- Research findings (e.g. proposed methods/system)
- Validation
- Conclusion
- References

RESEARCH / TECHNICAL SEMINAR

Course Code : 20MCA42A

Credits : 02

L:T:P:S : 0:0:0:2

CIE Marks : 25

Exam Hours : 3

SEE Marks : 25

Course Outcomes: At the end of the course, the student will be able to:

CO1	Identify the recent trends in computing technology to address research challenges.
CO2	Analyze and interpret the data related to a domain technology.
CO3	Develop required skills to proficient with the technologies.
CO4	Conceptualize the solution for the identified problem statement.
CO5	Formulate the methodology for the chosen problem statement.
CO6	Exemplify the communication skills for effective presentation.

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	-	-	-	-	-	-	-	-	-	1	-	-	3	3
CO2	1	-	-	2	-	-	-	-	-	1	-	-	3	3
CO3	1	-	-	-	2	-	-	-	-	1	-	-	3	3
CO4	1	2	3	2	-	-	-	-	-	1	-	-	3	3
CO5	1	2	1	-	-	-	-	-	-	1	-	-	3	3
CO6	1	2	1	-	-	-	-	-	3	1	-	-	3	3

RESEARCH / TECHNICAL SEMINAR:

This **RESEARCH / TECHNICAL SEMINAR** is based on current technological research trends.

Research / Technical Seminar Guidelines:

1. Select broad area of your interest (E.g. Computer Networks, Machine Learning/Data mining, Databases, etc...)
2. Select a specific research area. (E.g. In Data mining, one can choose cluster analysis or Classification or Association rule mining, subsequently you can choose a more narrowed topic like Density based clustering or Grid based clustering etc...)
3. Further search at least 15 recent research papers (e.g. last 2-5 years) related to your specific topic in IEEE explore or Science Direct or ACM digital library, etc... From these papers, select best 5 papers, preferably Journal papers or reputed conferences. (E.g. Machine Learning Journals: IEEE PAMI, Knowledge and Data engg. Elsevier – Pattern recognition, PRL, Data and Knowledge engineering, Springer- PAA, Data mining and Knowledge discovery, Reputed conferences- ICPR, CVPR, KDD, ICAPR, etc...)
4. Read these 5 papers thoroughly. Write down a summary of each paper based on their contributions (ideas), Improvements claimed, Parameters used for comparison, Experiments carried out, Tools used.
5. Write a report based on summary highlighting contributions, differences, your ideas to improve those methods, your analysis and interpretation.

Seminar Work Evaluation: (20MCA42A)

- Seminar coordinators follow rubrics, which is set by the Department for evaluation of seminar work and report prepared by the students.
- Seminar reviews will be evaluated by the respective internal guides.

ELECTIVE - 6
DESIGN THINKING

Course Code : 20MCA431A **Credits** : 02

L:T:P:S : 2:0:0:0 **CIE Marks** : 25

Exam Hours : 2 **SEE Marks** : 25

Course Outcomes: At the end of the course, the student will be able to:

CO1	Understand the fundamentals of design thinking.
CO2	Distinguish various tools and strategies for design thinking.
CO3	Implement a strategic business plan.
CO4	Derive a business model with its essential elements.
CO5	Evaluate the designs with required Law.
CO6	Develop the prototype using the design thinking methods.

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	-	-	-		-	-	-	-	-	-	-	-	3	3

RESEARCH METHODOLOGY AND IPR

Course Code : 20MCA432A Credits : 02

L:T:P:S : 2:0:0:0 CIE Marks : 25

Exam Hours : 2 SEE Marks : 25

Course Outcomes: At the end of the course, the student will be able to:

CO1	Understand the Research Methodology (RM) types and their significances.
CO2	Define a research problem and its design.
CO3	Illustrate the criteria of sampling with relevant characteristics.
CO4	Investigate IPR with its infringement & remedies.
CO5	Evaluate and protect author's work from theft or piracy.
CO6	Design a product or process to meet the products specification according to its originality.

Mapping of Course Outcomes to Program Outcomes:

ENTREPRENEURSHIP AND INNOVATION MANAGEMENT

Course Code : 20MCA433A **Credits** : 02

L:T:P:S : 2:0:0:0 **CIE Marks** : 25

Exam Hours : 2 **SEE Marks** : 25

Course Outcomes: At the end of the course, the student will be able to:

CO1	Discuss the fundamentals of innovation portfolio.
CO2	Distinguish Innovation voices through its various levels.
CO3	Illustrate the business model using the tools for profit and growth.
CO4	Examine the characteristics of opportunity costs and hidden benefits.
CO5	Evaluate the procedure for optimizing and eliminating the trade-offs.
CO6	Compose the real time case studies for Innovation and Entrepreneurship.

SYLLABUS			
Module	Contents of the Module	Hours	Cos
1	<p>Innovation Imperative: Introduction to Innovation, A key fallacy, Innovation to energize, Innovate for growth and profit, Innovate for survival.</p> <p>The Innovation Portfolio: Vision, Portfolios and Feelings, Strategy and Innovation, Identifying feelings and needs, Innovating experiences, Battling commoditization, Technology and psychology, Searching for innovation opportunities, Process Innovation, Innovation portfolios for established organizations, Pioneers, Migrators, Settlers.</p> <p>Case study – Ingersoll-Rand (India) Ltd.</p>	5	CO1 CO6
2	<p>The innovation voices: Thinking ‘Inside the Box’, The four voices, Voice of the Product, Profile your product for profit and growth, Voice of the customer, Voice of the organization, Inspiration, Perspiration, Foster creativity in organizations.</p> <p>The innovative mind: Introduction, Three levels of Innovation, Individual Innovator, Creativity muscles, Innovative teams, Build a global team, Innovative Organization.</p> <p>Case study - Reinventing project management at Tata Steel, Indicorps.</p>	5	CO2 CO6
3	<p>Tools for profit and growth: Price-Cost-Value – Introduction, Business model, Definitions, Business Design as Ecosystem, Systems Thinking, Feedback effects, Technology, Meet Psychology.</p> <p>Creating value, cutting costs: Friends or Foes, The power of vision, Best market research.</p> <p>Case study -Viewmax, Air Deccan.</p>	5	CO3 CO6

4	<p>Hidden costs, Hidden benefits: Measure and manage costs, Accounting vs. Economic costs, Definitions, Reading the numbers, Risk-adjusted opportunity cost of shareholders' equity, Search of the bottom-bottom line, Collect the rent, Other hidden costs.</p> <p>Depreciation: Hidden benefits, Reconciling growth and cost cutting, Measurement and Change management, Sunk costs.</p> <p>Case study - <i>Passenger power seat adjuster, Comprehensive Trauma consortium.</i></p>	5	CO4 CO6
5	<p>Trade-offs - Optimizing and elimination: Introduction, Efficiency and Effectiveness, Value Innovation, Defying Trade-offs, Even swaps, Comparative advantage.</p> <p>Case study–<i>Kodak's trade-off dilemma, Tata Consultancy Services-trade-offs.</i></p>	5	CO5 CO6

Text Books:

1. Entrepreneurship: A Tools – Oriented Approach, George Abe, Vandeplass Publishing, 2020, ISBN: 9781600425127.
2. Innovation Management, Shlomo Maital, D.V.R.Seshadri, SAGE publications, 2nd Edition, 2012, ISBN: 978-81-321-0722-4.
3. Innovation and Entrepreneurship, Drucker, Routledge, Harper Business Publishers, 2015, ISBN: 978-1-138-01919-5.

Reference Books:

1. Social Entrepreneurship and Innovation: International Case Studies and Practices, Peter Gabriel, Ken Banke, Kogar Page publishers, 2021, ISBN: 9781398695573.
2. Managing Technology Entrepreneurship and Innovation, Paul Trott, Dap Hartmann, Patrick Van der Duin, Victor, J. Roland, Taylor & Francis, 2015, ISBN: 9781317498209.
3. Digital Entrepreneurship and Global Innovation, Loana Lancu, IGI Global, 2016, ISBN: 9781522509547.

PROFESSIONAL ETHICS

Course Code : 20MCA434A

Credits : 02

L:T:P:S : 2:0:0:0

CIE Marks : 25

Exam Hours : 2

SEE Marks : 25

Course Outcomes: At the end of the Course, the Student will be able to:

CO1	Discuss the intricacies of ethical issues.
CO2	Summarize the aspects of computer crime and IPR.
CO3	Examine the policies for regulating Internet content and technology safety.
CO4	Investigate on the computer technologies for accessibility issues.
CO5	Evaluate the software development strategies with engineering standards.
CO6	Develop the social networking ethical issues.

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	-	1	-	-	-	3	1	-	-	1	-	-	3	3
CO2	-	1	-	-	-	3	1	-	-	1	-	-	3	3
CO3	-	1	-	-	-	3	1	-	-	1	-	-	3	3
CO4	-	1	-	-	-	3	1	-	-	1	-	-	3	3
CO5	2	1	-	-	-	3	1	-	-	1	-	-	3	3
CO6	-	1	2	-	-	3	1	-	-	1	-	-	3	3

SYLLABUS			
Module	Contents of the Module	Hours	COs
1	COMPUTER ETHICS INTRODUCTION AND COMPUTER HACKING: Introduction to Computer ethics, An overview, Identifying an ethical issue, Ethics and law, Ethical theories, Professional Code of conduct, An ethical dilemma, A framework for ethical decision making, Computer hacking, Introduction, definition of hacking, Destructive programs, hacker ethics, Professional constraints, BCS code of conduct, To hack or not to hack, Ethical positions on hacking.	5	CO1
2	ASPECTS OF COMPUTER CRIME AND INTELLECTUAL PROPERTY RIGHTS: Aspects of computer crime, Introduction to computer crime, computer security measures, Professional duties and obligations, Intellectual Property Rights, The nature of Intellectual property, Intellectual Property, Patents, Trademarks, Trade Secrets, Software Issues, Copyright, The extent and nature of software piracy, Ethical and professional issues, free software and open source code.	5	CO2
3	REGULATING INTERNET CONTENT, TECHNOLOGY AND SAFETY: Introduction, In defence of freedom expression, censorship, laws upholding free speech, Free speech and the Internet, Ethical and professional issues, Internet technologies and privacy, Safety and risk, assessment of safety and risk, Risk benefit analysis, reducing risk.	5	CO3

4	COMPUTER TECHNOLOGIES ACCESSIBILITY ISSUES: Introduction, Principle of equal access, Obstacles to access for individuals, professional responsibility, Empowering computers in the workplace, Introduction – computers and employment, computers and the quality of work, computerized monitoring in the work place, telecommuting, social, legal and professional issues, Use of Software, Computers and Internet-based Tools, Liability for Software errors, Documentation Authentication and Control, Software engineering code of ethics and practices, IEEE-CS – ACM Joint task force.	5	CO4
5	SOFTWARE DEVELOPMENT AND SOCIAL NETWORKING: Software Development, strategies for engineering quality standards, Quality management standards, Social Networking, Company owned social network web site, the use of social networks in the hiring process, Social Networking ethical issues, Cyber bullying, stalking, Online virtual world, Crime in virtual world, digital rights management, Online defamation, Piracy and Fraud.	5	CO5 CO6

Text Books:

1. Ethics in Computing, Science and Engineering, Barry G. Bludell, Springer International publishing, 2020, ISBN: 9783030271268.
2. Ethics in Information Technology, George Reynolds, CengageLearning, 2011.
3. Ethical, legal and professional issues in computing, Penny Duqueno, Simon Jones and Barry G Blundell, Middlesex University Press, 2008.

References Books:

1. Ethics in Engineering Practice and Research, Cambridge University Press, 2011.
2. A Gift of Fire: Social, Legal, and Ethical Issues for Computing and the Internet, Sara Baase, 3rd Edition, Prentice Hall, 2008.

Assessment Pattern:

ECONOMICS FOR SOFTWARE ENGINEERS

Course Code : 20MCA435A **Credits** : 02

L:T:P:S : 2:0:0:0 **CIE Marks** : 25

Exam Hours : 2 **SEE Marks** : 25

Course Outcomes: At the end of the course, the student will be able to:

CO1	Discuss overview of software systems life cycle costing and engineering economy.
CO2	Categorize economic analysis alternatives for life cycle framework techniques.
CO3	Characterize Simulation based costing and costing complex systems.
CO4	Identify parametric cost estimation methods for software-intensive systems.
CO5	Evaluate costing and managing Off-the Shelf Systems.
CO6	Formulate Project Management's Role in life cycle costing.

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	1	-	1	-	-	1	3	-	-	1	-	3	3
CO2	-	1	-	1	-	-	1	3	-	-	1	-	3	3
CO3	-	1	-	1	3	-	1	3	-	-	1	-	3	3
CO4	-	1	-	1	-	-	1	3	-	-	1	-	3	3
CO5	-	1	-	1	-	-	1	3	-	-	1	-	3	3
CO6	-	1	-	1	-	-	1	3	-	-	1	-	3	3

SYLLABUS			
Module	Contents of the Module	Hours	COs
1	<p>Overview of Systems Life Cycle Costing: Introduction to Systems Life Cycle Costing, Economic Analysis, Cost Estimation – Parametric, Analogy, Engineering Build-up, Cost Management.</p> <p>Introduction to Engineering Economy: Introduction, Capital Budgeting Decision, Time Value of Money, Amortization, Investment/Deflation.</p>	5	CO1
2	<p>Advanced Economic Analysis of Alternatives: Introduction to Advanced Cash Flow analysis – Depreciation, Corporate Income Taxes, Income and Cash Flow Statements, Expected Value, Sensitivity Analysis, Break-Even Analysis.</p> <p>Life Cycle Framework and Techniques: Introduction to Developing Life Cycle Models, Developing LCC Models, Categories, Estimating LCC throughout the Product.</p>	5	CO2
3	<p>Simulation-Based Costing: Introduction, Review of Probability and Statistics, Discrete Process Generators, Continuous Process Generators, Probability and Statistics, Simulation in Practice, Using Readiness Level for Model Input, Simulation using Spreadsheets.</p> <p>Costing of Complex Systems: Introduction, Issues surrounding complex systems, Systems Engineering and Management Costs – Hardware Costs, Software Costs, Interfaces and Integration at the System Level, System Engineering/Project Management Costs and Requirements to Architectures.</p>	5	CO3

4	<p>Software-Intensive Systems: Introduction, Software Estimating Techniques, Algorithmic, Mathematical and Statistical.</p> <p>Parametric Cost Estimation: Introduction, Role of statistics, Some CERs Interest – Learning Curves, Wright’s method.</p> <p>Cost as an Independent Variable: Introduction, CAIV Evolution through the Life Cycle, CAIV Metrics, Design to Cost versus CAIV.</p>	5	CO4
5	<p>Costing and Managing Off-the Shelf Systems: Introduction, COTS – Hardware-centric, Software-centric, Integration Costs, GOTS, Software Reuse, Open Source.</p> <p>Cost of Quality: Introduction, Six Sigma, CMMI, Generic Cost of Quality Models.</p> <p>Project Management’s Role in Life Cycle Costing: Introduction, Basics of Networks, Work Breakdown Structure, Progress Measurement, Simulation of Networks.</p>	5	CO5 CO6

Text Books:

1. Systems Life Cycle Costing – Economic Analysis, Estimation and Management, John Vail Farr, CRC Press, 2011, ISBN: 978-1-4398-2892-2.
2. Life Cycle Sustainability Assessment for Decision Making – Methodologies and Case Studies, Jingzheng Ren, Sara Toniolo, Elsevier, 2020, ISBN: 978-0-12-818355-7.

Reference Books:

1. Life-Cycle Cost Models for Green Buildings with Optimal green star credits, I.M.Chethana S. Illankoon, Vivian W.Y. Tam and Khoa N.LE, Elsevier, 2021, ISBN: 978-0-12-820062-9.
