# **NEW HORIZON COLLEGE OF ENGINEERING**

## **VISION**

To emerge as an institute of eminence in the fields of engineering, technology and management in serving the industry and the nation by empowering students with a high degree of technical, managerial and practical competence.

## **MISSION**

To strengthen the theoretical, practical and ethical dimensions of the learning process by fostering a culture of research and innovation among faculty members and students.

To encourage long-term interaction between the academia and industry through their involvement in the design of curriculum and its hands-on implementation.

To strengthen and mould students in professional, ethical, social and environmental dimensions by encouraging participation in co-curricular and extracurricular activities.

## **QUALITY POLICY**

To provide educational services of the highest quality both curricular and co-curricular to enable students integrate skills and serve the industry and society equally well at global level.

## **VALUES**

- Academic Freedom
- Integrity
- Inclusiveness
- Innovation
- Professionalism
- Social Responsibility

# **DEPARTMENT OF MASTER OF COMPUTER APPLICATIONS**

## **VISION**

To emerge as a department of eminence in the field of Computer Applications in serving the Information Technology Industry and the nation by empowering students with a high degree of technical, managerial and practical competence.

## **MISSION**

To strengthen the theoretical, practical and ethical aspects of the learning while inculcating a culture of research, innovation and practical applications amongst faculty and students.

To encourage long-term interactions between the department and the IT Industry through rich involvement of the Industry in the design of the curriculum and its hands-on implementation.

To strengthen and mold students in professional, ethical, social and environmental dimensions by encouraging participation in co-curricular and extracurricular activities.

## **QUALITY POLICY**

To provide services of the highest quality both curricular and co-curricular, so that our students can integrate their skills and serve the industry and society equally well at the global level.

## **PROGRAMME EDUCATIONAL OBJECTIVES (PEOs)**

**PEO1** Excel in the field of Computer Applications and contribute to academia, industry and research.

**PEO2** Deliver software solutions that are socially relevant and adapt quickly to emerging technologies.

**PEO3** Demonstrate professional behavior by understanding ethical and communication skills to engage in lifelong learning.

## PROGRAMME OUTCOMES (POs)

- P01 Computational Knowledge:** Apply computing knowledge, mathematical knowledge and domain knowledge to create and develop new models for real world applications.
- P02 Problem Analysis:** Identify, formulate, review research literature and analyze complex problems using principles of mathematics, computing sciences and relevant domains.
- P03 Design / Development of Solutions:** Design, implement, test and maintain solutions for systems, components or processes that meet specific needs with consideration for public health safety, societal and environmental issues.
- P04 Conduct investigations of complex Computing problems:** Use Research-based knowledge to analyze and interpret data to obtain viable conclusions.
- P05 Modern Tool Usage:** Use modern tools, techniques and skills to solve complex and critical computing problems with an understanding of their limitations.
- P06 Professional Ethics:** Understand and apply ethical principles, cyber regulations and commit to professional computing practice and responsibilities.
- P07 Life-long Learning:** Recognize the importance of self-learning for continual development as a computing professional.
- P08 Project management and finance:** Demonstrate the management principles for managing projects as an individual, as a member and as a leader in a team under multidisciplinary environments.
- P09 Communication Efficacy:** Recognize the importance of communication within the computing community and the society at large.
- P010 Societal and Environmental Concern:** Understand and assess the local and global influence of software solutions and responsibilities related to professional computing practice.
- P011 Individual and Team Work:** Deliver effectively as an individual and as a member or leader in diverse teams and in multidisciplinary environments.
- P012 Innovation and Entrepreneurship:** Adopt standardized computer application practices with innovative ideas to succeed as an employee or an entrepreneur.

## PROGRAM SPECIFIC OUTCOMES (PSOs)

### PSO1

Acquire skills on computing technologies to analyze, design and develop industry-oriented real-time applications.

### PSO2

Inculcate technical communication skills and ethics with professional practices to strengthen the research-gap, career growth and employability.

### PEO to Mission Statement Mapping Correlation: 3- High, 2-Medium, 1-Low

| Mission Statements  | PEO1 | PEO2 | PEO3 |
|---|------|------|------|
| To strengthen the theoretical, practical and ethical aspects of the learning while inculcating a culture of research, innovation and practical applications amongst faculty and students. | 3    | 3    | 3    |
| To encourage long-term interactions between the department and the IT Industry through rich involvement of the Industry in the design of the curriculum and its hands-on implementation.  | 3    | 2    | 3    |
| To strengthen and mould students in professional, ethical, social and environmental dimensions by encouraging participation in co-curricular and extra-curricular activities.             | 3    | 3    | 3    |

## Mapping of POs to PEOs

| PO's | P01 | P02 | P03 | P04 | P05 | P06 | P07 | P08 | P009 | P010 | P011 | P012 |
|------|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|
| PE01 | 3   | 3   | 3   | 3   | 3   | 2   | 1   | 3   | 2    | 2    | 3    | 3    |
| PE02 | 3   | 3   | 3   | 2   | 3   | 2   | 1   | 3   | 2    | 3    | 3    | 3    |
| PE03 | 2   | 2   | 3   | 2   | 2   | 3   | 3   | 2   | 2    | 3    | 2    | 2    |

**Correlation:** 3-High, 2-Medium, 1-Low

# NEW HORIZON COLLEGE OF ENGINEERING

Autonomous College Permanently Affiliated to VTU, Approved by AICTE & UGC  
Accredited by NAAC with 'A' Grade. Accredited by NBA

The Trust is a Recipient of Prestigious Rajyotsava State Award 2012 Conferred by the Government of Karnataka.  
Awarded Outstanding Technical Education Institute in Karnataka.

L -Lecture (1 hour), T- Tutorial (2 hours), P-Practical (2 hours), S-Self Study (hours – Nil)  
PEC-Professional Elective Course, SEM-Seminar, PROJ- Project Work, AUD/AEC – Audit Course / Ability Enhancement Course.  
OEC-Industrial Open Elective Course, Credit for OEC is 03 (L: T: P:S) can be considered as(3: 0: 0 : 0).  
The teaching and learning of these Courses will be based on hands-on. The Course Assessment will be based on CIE and SEE in practical mode. These Courses will be offered by Centre of Excellence to students of all the branches. Registration to Industrial open electives shall be documented and monitored on college level.

**Activity-Based Learning (Suggested Activities in Class)/ Practical Based learning:**

- Demonstration of cloud platforms
- Video demonstration of Amazon web services
- Hands on session on creating an account in public cloud
- Contents related activities (Activity-based discussions)
  - Seminars
  - Active participation of students in creating an account in public cloud platforms

**Activity-Based Learning (Suggested Activities in Class)/ Practical Based learning**

- Demonstration of working of M2M.
- Demonstration of basic IoT Protocols & IoT Programming.
- Video demonstration of latest trends in IoT applications.
- Contents related activities (Activity-based discussions)
  - For active participation of students, instruct the students to prepare IoT projects
  - Organizing Group wise discussions on issues & Expert Talk

**Activity-Based Learning (Suggested Activities in Class)/ Practical Based learning**

- Demonstration of data pre-processing operations
- Demonstration of data manipulation process
- Demonstration of data visualization
- Video demonstration of real time applications of data science
- Contents related activities (Activity-based discussions)
  - For active participation of students, instruct the students to import any dataset from repositories for data exploration and visualization process
  - Seminars

**Activity-Based Learning (Suggested Activities in Class)/ Practical Based learning**

- Demonstration of working of Android Framework.
- Demonstration of basic UI design.
- Demonstration of intent, services.
- Video demonstration of latest trends in mobile applications.
- Contents related activities (Activity-based discussions)
  - For active participation of students, instruct the students to prepare Apps
  - Organizing Group wise discussions on issues

**Activity-Based Learning (Suggested Activities in Class)/ Practical Based learning**

- Visit to any software industry to understand the process of agile software development
- Video demonstration of latest trends in agile software development techniques
- Contents related activities (Activity-based discussions)
  - For active participation of students, instructing students to work on a few case studies
  - Organizing Group wise discussions on challenges and issues in agile software development
  - Student Presentations

|  | <ul style="list-style-type: none"> <li>Basic HTML Programming</li> <li>Basic PHP Programming</li> <li>Basic Java Programming</li> </ul> |            |            |            |            |            |            |            | 3                  | NA          |             |             |             |             |  |
| <b>PART-A</b>  |   |            |            |            |            |            |            |            |                    |             |             |             |             |             |  |
| 1  | To design a user interface for a given scenario using basic tags, lists, hyperlinks and tables using HTML.                              |            |            |            |            |            |            |            | 3                  | 22MCAL36.1  |             |             |             |             |  |
| 2  | To design aesthetic web page for user registration using HTML forms.  |            |            |            |            |            |            |            | 3                  | 22MCAL36.1  |             |             |             |             |  |
| 3  | To demonstrate the concepts of CSS selectors and conflict resolution.   |            |            |            |            |            |            |            | 3                  | 22MCAL36.1  |             |             |             |             |  |
| 4  | To demonstrate the concepts of syntactic structures of JavaScript.  |            |            |            |            |            |            |            | 3                  | 22MCAL36.2  |             |             |             |             |  |
| 5  | To demonstrate the Client-side validation using JavaScript events.  |            |            |            |            |            |            |            | 3                  | 22MCAL36.2  |             |             |             |             |  |
| <b>PART-B</b>  |   |            |            |            |            |            |            |            |                    |             |             |             |             |             |  |
| 6  | To demonstrate the concepts of various UI components of Bootstrap.  |            |            |            |            |            |            |            | 3                  | 22MCAL36.2  |             |             |             |             |  |
| 7  | To demonstrate the working of Server-side program with forms using PHP  |            |            |            |            |            |            |            | 3                  | 22MCAL36.3  |             |             |             |             |  |
| 8  | To demonstrate working with MySQL (creating database and tables, populate it with data)   |            |            |            |            |            |            |            | 3                  | 22MCAL36.3  |             |             |             |             |  |
| 9  | To demonstrate the database access with PHP   |            |            |            |            |            |            |            | 3                  | 22MCAL36.3  |             |             |             |             |  |
| 10   | To demonstrate the use of directives using AngularJS.   |            |            |            |            |            |            |            | 3                  | 22MCAL36.4  |             |             |             |             |  |
| 11   | To demonstrate the use of services using AngularJS.   |            |            |            |            |            |            |            | 3                  | 22MCAL36.4  |             |             |             |             |  |
| 12   | Create AngularJS application  |            |            |            |            |            |            |            | 3                  | 22MCAL36.4  |             |             |             |             |  |

**PART-C**  
**Beyond Syllabus Virtual Lab Content**  
**(To be done during Lab but not to be included for CIE or SEE)**

<https://html-iitd.vlabs.ac.in/exp/webpage-layout-in-html/>

**CIE Assessment Pattern (50 Marks - Lab)**

| RBT Levels |            | Test (s) | Weekly Assessment |
|------------|------------|----------|-------------------|
|            |            | 20       | 30                |
| L1         | Remember   | -        | -                 |
| L2         | Understand | 5        | 10                |
| L3         | Apply      | 5        | 10                |
| L4         | Analyze    | 5        | 5                 |
| L5         | Evaluate   | 5        | 5                 |
| L6         | Create     | -        | -                 |

**SEE Assessment Pattern (50 Marks - Lab)**

| RBT Levels |            | Exam Marks Distribution (50) |
|------------|------------|------------------------------|
| L1         | Remember   | -                            |
| L2         | Understand | 05                           |
| L3         | Apply      | 15                           |
| L4         | Analyze    | 20                           |
| L5         | Evaluate   | 10                           |
| L6         | Create     | -                            |

## INTERNSHIP

|                    |                |                    |            |
|--------------------|----------------|--------------------|------------|
| <b>Course Code</b> | <b>22MCA38</b> | <b>CIE Marks</b>   | <b>50</b>  |
| <b>L:T:P:S</b>     | <b>0:0:6:0</b> | <b>SEE Marks</b>   | <b>50</b>  |
| <b>Hrs / Week</b>  | <b>-</b>       | <b>Total Marks</b> | <b>100</b> |
| <b>Credits</b>     | <b>06</b>      | <b>Exam Hours</b>  | <b>03</b>  |

### Course outcomes:

At the end of the course, the student will be able to:

|           |  |
|-----------|--|
| 22MCA38.1 | Identify skills to work and gain knowledge in the software industry. |
| 22MCA38.2 | Apply theoretical knowledge and practical knowledge.                 |
| 22MCA38.3 | Analyze real-time experience and develop code for a project.         |
| 22MCA38.4 | Justify the strengths in tune with the current industry demands.     |
| 22MCA38.5 | Use effective communication skills for technical presentations.      |

### Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:

|           | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |
|-----------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|------|
| 22MCA38.1 | -   | 2   | -   | -   | -   | 1   | -   | -   | -   | -    | 3    | -    | -    | 3    |
| 22MCA38.2 | 2   | 2   | 2   | -   | -   | -   | -   | 1   | -   | -    | 2    | -    | -    | 3    |
| 22MCA38.3 | 1   | -   | 1   | -   | 1   | -   | -   | 1   | -   | -    | 2    | -    | -    | 3    |
| 22MCA38.4 | 1   | -   | -   | 1   | -   | -   | -   | -   | 2   | -    | 1    | -    | -    | 3    |
| 22MCA38.5 | -   | -   | -   | -   | -   | -   | -   | 2   | 3   | -    | 2    | -    | -    | 3    |

### General Guidelines:

1. The project work must be done individually in a software firm or any R & D Institution.
2. The project should be high quality simulated application project work, for a total duration of 6 weeks (which should either be taken after the completion of second semester and before the beginning of the third semester / completion of the third semester and before beginning the fourth semester.
3. Project work may be application-oriented or research-oriented as per student interest. Therefore, the project reports will vary depending on the type of project undertaken.
4. The student is expected to submit his/her synopsis within a week of time from the commencement of the internship.
5. An Internal guide will be allocated for each student.
6. The status of project progress must be updated with the internal guide every week.
7. Presentations should be given during subsequent project reviews.
8. Project verification at the place of project work must be mandatory by the external guide, for completion of the work.
9. Project report must be checked for plagiarism, similarity index must be less than or equal to 10%.
10. The CIE of the project work will be evaluated based on the well-defined rubrics during subsequent project reviews.
11. The project report will be evaluated by both internal and external guide assigned by the COE.
12. Final presentation of the project report and viva-voce will be from the SEE.
13. If the project report is not as per the format and not a high quality simulated application project, external examiners will have every right to reject the project.

**CIE Assessment Pattern (50 Marks )**

| Semester End Examination | Tests Marks |
|--------------------------|-------------|
| Internship Report        | 20          |
| Seminar                  | 20          |
| Question and Answer      | 10          |
| Total Marks              | 50          |

**SEE Assessment Pattern (50 Marks )**

| Semester End Examination | Tests Marks |
|--------------------------|-------------|
| Internship Report        | 20          |
| Seminar                  | 20          |
| Question and Answer      | 10          |
| Total Marks              | 50          |

### TECHNICAL SEMINAR – 1

|                    |                |                    |            |
|--------------------|----------------|--------------------|------------|
| <b>Course Code</b> | <b>22MCA39</b> | <b>CIE Marks</b>   | <b>50</b>  |
| <b>L:T:P:S</b>     | <b>0:0:0:2</b> | <b>SEE Marks</b>   | <b>50</b>  |
| <b>Hrs / Week</b>  | <b>-</b>       | <b>Total Marks</b> | <b>100</b> |
| <b>Credits</b>     | <b>02</b>      | <b>Exam Hours</b>  | <b>03</b>  |

**Course outcomes:**

At the end of the course, the student will be able to:

|           |  |
|-----------|--|
| 22MCA39.1 | Identify the recent trends in computing technologies to address research challenges.         |
| 22MCA39.2 | Examine existing literature in the field of study.   |
| 22MCA39.3 | Analyze case studies, tools, methodologies, technique, and algorithms in the selected study. |
| 22MCA39.4 | Use the communication skills and report writing skills for effective presentation.           |
| 22MCA39.5 | Derive the outcomes for future study.  |

**Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:**

|           | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |
|-----------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|------|
| 22MCA39.1 | 3   | 2   | -   | 2   | -   | -   | -   | -   | -   | -    | -    | -    | -    | 3    |
| 22MCA39.2 | 3   | 2   | 1   | 2   | -   | -   | -   | -   | -   | -    | -    | -    | -    | 3    |
| 22MCA39.3 | 3   | 2   | -   | 2   | 2   | -   | -   | -   | -   | -    | -    | -    | -    | 3    |
| 22MCA39.4 | 1   | 1   | 1   | -   | -   | 2   | 1   | -   | 3   | -    | -    | -    | -    | 3    |
| 22MCA39.5 | 2   | 1   | -   | -   | -   | -   | 1   | -   | 1   | -    | 2    | -    | -    | 3    |

Technical Seminar is based on current technological research trends.

**GUIDELINES:**

1. Select any broad area of research or technical topics of interest (E.g. Machine Learning/Data mining, Computer Networks, Cloud Computing, etc.)
2. Select a specific topic of inquiry. (E.g. In Data mining, one can choose cluster analysis or Classification or Association rule mining, consequently a more confined topic like Density based clustering or Grid based clustering etc. can be decided.)
3. Explore for at least 15 to 20 recent research papers (e.g. last 2-5 years in IEEE explore or Science Direct or ACM digital library, etc..) related to the specific topic chosen. From these papers, select best 5 to 8 papers, preferably Journal papers or reputed conferences.
4. Examine these selected papers systematically. Write down a summary of each paper based on their contributions (ideas), Improvements claimed, Parameters used for comparison, Experiments carried out, Tools used.
5. Write a report based on summary highlighting contributions, differences, further ideas to improve those methods, analysis and interpretation.

**Technical Seminar Evaluation:**

Seminar coordinators follow rubrics, which is set by the Department for evaluation of seminar work and report prepared by the students.

- Seminar reviews will be evaluated by the respective internal guides.

**CIE Assessment Pattern (50 Marks)**

Evaluation would be carried out in TWO phases. The evaluation criteria shall be as per the rubrics given below:

| <b>Continuous Internal Evaluation</b>   | <b>Marks</b> |
|---|--------------|
| Review: Phase 1: Selection of topic – Technical Relevance, review of literature, Sustainability and Societal Concerns, presentation of the selected study | 25           |
| Review: Phase 2: Technological developments and analysis, Presentation skills, Report writing   | 25           |

The evaluation will be done by a Senior faculty / Internal Guide from the department and ONE External member from Academia / Industry / Research Organization.

**SEE evaluation: (50 Marks)**

| <b>Rubrics</b>  | <b>Marks</b> |
|---|--------------|
| <b>Topic</b>  | 5            |
| <b>Literature Review</b>  | 10           |
| <b>Technical relevance Sustainability and Societal Concerns</b> | 15           |
| <b>Presentation Skills</b>                                      | 10           |
| <b>Viva- Voce</b>   | 10           |

## TECHNICAL SEMINAR - 2

|                    |                |                    |            |
|--------------------|----------------|--------------------|------------|
| <b>Course Code</b> | <b>22MCA42</b> | <b>CIE Marks</b>   | <b>50</b>  |
| <b>L:T:P:S</b>     | <b>0:0:0:2</b> | <b>SEE Marks</b>   | <b>50</b>  |
| <b>Hrs / Week</b>  | <b>-</b>       | <b>Total Marks</b> | <b>100</b> |
| <b>Credits</b>     | <b>02</b>      | <b>Exam Hours</b>  | <b>03</b>  |

### Course outcomes:

At the end of the course, the student will be able to:

|           |  |
|-----------|--|
| 22MCA42.1 | Identify the recent trends in computing technologies to address research challenges.         |
| 22MCA42.2 | Examine existing literature in the field of study.   |
| 22MCA42.3 | Analyze case studies, tools, methodologies, technique, and algorithms in the selected study. |
| 22MCA42.4 | Use the communication skills and report writing skills for effective presentation.           |
| 22MCA42.5 | Derive the outcomes for future study.  |

### Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:

|           | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |
|-----------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|------|
| 22MCA42.1 | 3   | 2   | -   | 2   | -   | -   | -   | -   | -   | -    | -    | -    | -    | 3    |
| 22MCA42.2 | 3   | 2   | 1   | 2   | -   | -   | -   | -   | -   | -    | -    | -    | -    | 3    |
| 22MCA42.3 | 3   | 2   | -   | 2   | 2   | -   | -   | -   | -   | -    | -    | -    | -    | 3    |
| 22MCA42.4 | 1   | 1   | 1   | -   | -   | 2   | 1   | -   | 3   | -    | -    | -    | -    | 3    |
| 22MCA42.5 | 2   | 1   | -   | -   | -   | -   | 1   | -   | 1   | -    | 2    | -    | -    | 3    |

Technical Seminar is based on current technological research trends.

### GUIDELINES:

1. Select any broad area of research or technical topics of interest (E.g. Machine Learning/Data mining, Computer Networks, Cloud Computing, etc.)
2. Select a specific topic of inquiry. (E.g. In Data mining, one can choose cluster analysis or Classification or Association rule mining, consequently a more confined topic like Density based clustering or Grid based clustering etc. can be decided.)
3. Explore for at least 15 to 20 recent research papers (e.g. last 2-5 years in IEEE explore or Science Direct or ACM digital library, etc..) related to the specific topic chosen. From these papers, select best 5 to 8 papers, preferably Journal papers or reputed conferences.
4. Examine these selected papers systematically. Write down a summary of each paper based on their contributions (ideas), Improvements claimed, Parameters used for comparison, Experiments carried out, Tools used.
5. Write a report based on summary highlighting contributions, differences, further ideas to improve those methods, analysis and interpretation.

### Technical Seminar Evaluation:

Seminar coordinators follow rubrics, which is set by the Department for evaluation of seminar work and report prepared by the students.

- Seminar reviews will be evaluated by the respective internal guides.

**CIE Assessment Pattern (50 Marks)**

Evaluation would be carried out in TWO phases. The evaluation criteria shall be as per the rubrics given below:

| <b>Continuous Internal Evaluation</b>   | <b>Marks</b> |
|---|--------------|
| Review: Phase 1: Selection of topic – Technical Relevance, review of literature, Sustainability and Societal Concerns, presentation of the selected study | 25           |
| Review: Phase 2: Technological developments and analysis, Presentation skills, Report writing   | 25           |

The evaluation will be done by a Senior faculty / Internal Guide from the department and ONE External member from Academia / Industry / Research Organization.

**SEE evaluation: (50 Marks)**

| <b>Rubrics</b>  | <b>Marks</b> |
|---|--------------|
| <b>Topic</b>  | 5            |
| <b>Literature Review</b>  | 10           |
| <b>Technical relevance Sustainability and Societal Concerns</b> | 15           |
| <b>Presentation Skills</b>                                      | 10           |
| <b>Viva- Voce</b>   | 10           |

# APPENDICES

## APPENDIX A

### Outcome Based Education

Outcome-based education (OBE) is an educational theory that bases each part of an educational system around goals (outcomes). By the end of the educational experience, each student should have achieved the goal. There is no specified style of teaching or assessment in OBE; instead, classes, opportunities, and assessments should all help students achieve the specified outcomes.

There are three educational outcomes as defined by the National Board of Accreditation: Program Educational Objectives: The Educational Objectives of the Computer Applications program are the statements that describe the expected achievements of graduate in their career and in particular, what the graduates are expected to perform and achieve during the first few years after graduation. [nbaindia.org]

**Program Outcomes: What the student would demonstrate upon graduation. Graduate attributes are separately listed in Appendix B**

**Course Outcome:** The specific outcome/s of each course/subject that is a part of the program curriculum. Each subject/course is expected to have a set of Course Outcomes.

**Mapping of Outcome:**

## APPENDIX B

### The Graduate Attributes of NBA

- PO1 Computational Knowledge:** Apply knowledge of computing fundamentals, computing specialization, mathematics, and domain knowledge appropriate for the computing specialization to the abstraction and conceptualization of computing models from defined problems and requirements.
- PO2 Problem Analysis:** Identify, formulate, research literature, and solve complex computing problems reaching substantiated conclusions using fundamental principles of mathematics, computing sciences, and relevant domain disciplines.
- PO3 Design /Development of Solutions:** Design and evaluate solutions for complex computing problems, and design and evaluate systems, components, or processes that meet specified needs with appropriate consideration for public health and safety, cultural, societal, and environmental considerations.
- PO4 Conduct Investigations of Complex Computing Problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- PO5 Modern Tool Usage:** Create, select, adapt and apply appropriate techniques, resources, and modern computing tools to complex computing activities, with an understanding of the limitations.
- PO6 Professional Ethics:** Understand and commit to professional ethics and cyber regulations, responsibilities, and norms of professional computing practice.
- PO7 Life-long Learning:** Recognize the need, and have the ability, to engage in independent learning for continual development as a computing professional.
- PO8 Project management and finance:** Demonstrate knowledge and understanding of the computing and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- PO9 Communication Efficacy:** Communicate effectively with the computing community, and with society at large, about complex computing activities by being able to comprehend and write effective reports, design documentation, make effective presentations, and give and understand clear instructions.
- PO10 Societal and Environmental Concern:** Understand and assess societal, environmental, health, safety, legal, and cultural issues within local and global contexts, and the consequential responsibilities relevant to professional computing practice.
- PO11 Individual and Team Work:** Function effectively as an individual and as a member or leader in diverse teams and in multidisciplinary environments.
- PO12 Innovation and Entrepreneurship:** Identify a timely opportunity and using innovation to pursue that opportunity to create value and wealth for the betterment of the individual and society at large.

## APPENDIX C

### BLOOM'S TAXONOMY

Bloom's taxonomy is a classification system used to define and distinguish different levels of human cognition—i.e., thinking, learning, and understanding. Educators have typically used Bloom's taxonomy to inform or guide the development of assessments (tests and other evaluations of student learning), curriculum (units, lessons, projects, and other learning activities), and instructional methods such as questioning strategies.
