🥘 2:00 PM

9 Falconry Seminar Hall

Objective:

The objective of the guest lecture on Agile Model and Automation Testing was to equip participants with a comprehensive understanding of the principles and practices associated with Agile methodologies in software testing. The lecture aimed to elucidate the iterative and collaborative aspects of Agile testing, emphasizing its role in modern software development. Additionally, the objective was to familiarize attendees with the significance of automation testing in accelerating development cycles and achieving higher software quality. The ultimate goal was to empower participants with practical knowledge and insights, enabling them to implement Agile testing strategies and leverage automation tools effectively in their professionalende avors.

Content:

- Introduction to Automation Testing
- Features of Selenium Suite
- Agile Model-Introduction
- Agile Model Methodologies
- Selenium web driver Installation
- Interaction with Students

Outcome:

The guest lecture on Agile Model and Automation Testing provided valuable insights into the dynamic landscape of software testing methodologies. Participants gained a deeper understanding of the principles and practices of Agile testing, emphasizing its iterative and collaborative nature. The lecture provided the significance of automation testing in accelerating development cycles and ensuring software quality. Attendees learned the intricacies of Agile testing with practical knowledge of implementing Agile testing strategies, using automation tools, and optimizing testing processes for efficient and effective software development. The outcome included enhanced awareness, actionable insights, and a strengthened foundation for integrating Agile and automation testing into real-world projects.
