

NEW HORIZON COLLEGE OF ENGINEERING

EVENT NAME: Workshop on “Java Coding Essentials: Hands-on Foundational Concepts and Practical Coding Practices”

Organized by
Department of MCA

DATE: 21st February 2025

VENUE: B306

BRIEF DESCRIPTION OF THE EVENT:

The primary objective of the workshop was to provide participants with in-depth knowledge on key Java programming concepts and tools. The session was designed to strengthen problem-solving skills, encourage best practices, and equip participants with practical knowledge for efficient software development.

Topics Emphasized:

- **Overview of key concepts in Java programming**
The session began with an overview of key concepts in java that covered method overloading, method overriding, static keyword, exception handling, multithreading and concurrency.
- **IntelliJ IDEA IDE**
The workshop introduced IntelliJ IDEA, a widely used integrated development environment (IDE) for Java. Participants explored its intelligent code assistance, debugging features, and shortcuts that improve coding efficiency.
- **ExecutorService**
The concept of ExecutorService was explained as a Java framework for managing multithreading and concurrent task execution. The session covered different types of thread pools and their applications, helping participants understand how to efficiently execute multiple tasks.
- **JSON Placeholder API**
A free online REST API used for testing, was introduced to demonstrate API interactions. Students understood making API calls to retrieve and manipulate JSON data. The session highlighted how developers can use JSON Placeholder to simulate real API responses and integrate web services into applications.

- **HTTP Call Request**

The importance of HTTP call requests in web communication was explained, focusing on sending and receiving data between client applications and servers. Participants worked with Java's built-in HTTP clients to execute GET, POST, PUT, and DELETE requests.

- **Orphan Objects**

Orphan objects and their impact on memory management in Java was discussed. Participants learned how objects that are no longer referenced still occupy memory until garbage collected.

Outcomes: By the end of the session, students were able to:

- Gain hands-on experience with Java development tools, improving their coding efficiency and debugging skills.
- Obtain a strong understanding of handling multithreading, making HTTP requests, and integrating APIs effectively.
- Understand memory management and best practices for writing optimized and efficient Java code..

ACTIVITIES CONDUCTED:

- **Case Study and Practical Application:** Participants were involved in developing a ticket booking application incorporating key concepts covered in the session. They implemented multithreading to handle multiple booking requests, HTTP requests for API interactions, and managed memory efficiently to prevent orphan objects.
- **Q&A and Discussion:** The session addressed participant queries and highlighted the importance of data structures in writing efficient code. Also the importance of providing genuine content in resumes was emphasized. Interview preparation tips and essential skills for success in the IT industry were also discussed, making the session both technical and career-focused.

NO. OF PARTICIPANTS: 48

WINNERS (if any, for activities conducted): NA

GUEST DETAILS:

Mr. Ankit Kumar

Software Engineer

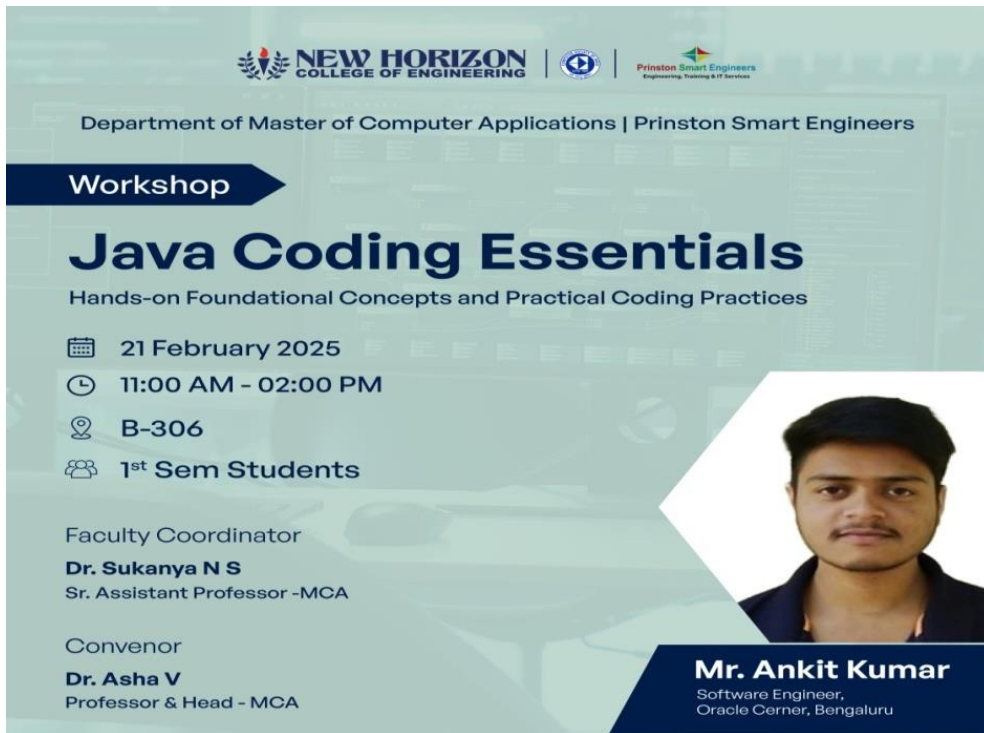

Oracle Cerner, Bengaluru

PHOTOGRAPHS OF THE EVENT:

POSTER:

The poster features a light green background with a subtle grid pattern. At the top, it displays the logos for New Horizon College of Engineering and Prinston Smart Engineers. Below the logos, the text reads 'Department of Master of Computer Applications | Prinston Smart Engineers'. A dark blue arrow-shaped box contains the word 'Workshop'. The main title 'Java Coding Essentials' is in a large, bold, dark blue font, followed by the subtitle 'Hands-on Foundational Concepts and Practical Coding Practices'. Event details are listed with icons: a calendar for '21 February 2025', a clock for '11:00 AM - 02:00 PM', a location pin for 'B-306', and a group of people for '1st Sem Students'. Faculty information includes 'Faculty Coordinator Dr. Sukanya N S, Sr. Assistant Professor -MCA' and 'Convenor Dr. Asha V, Professor & Head - MCA'. A portrait of Mr. Ankit Kumar is shown in a white hexagonal frame, with his name and title 'Software Engineer, Oracle Cerner, Bengaluru' in a dark blue box below it.

Attendance:

WORKSHOP- JAVA CODING ESSENTIALS: HANDS-ON FOUNDATIONAL CONCEPTS AND PRACTICAL CODING PRACTICES
DATED: 21-02-2025

 **NEW HORIZON**
COLLEGE OF ENGINEERING
New Horizon College of Engineering, Park, Jyoti Road, Kalyan
Administrative College Partnership, Affiliated to PCC, Approved by AICTE & UGC
Recognized by RAAC with B Grade, Accredited by NBA

DEPARTMENT OF MCA
ATTENDANCE SHEET OF PARTICIPANTS
WORKSHOP- JAVA CODING ESSENTIALS: HANDS-ON FOUNDATIONAL
CONCEPTS AND PRACTICAL CODING PRACTICES
AY 2024-25

RESOURCE PERSON: Mr. ANKIT KUMAR
SOFTWARE ENGINEER, ORACLE CERNER, BENGALURU

DATE: 21-02-2025
TIME: 11:00 am to 2:00 pm
PARTICIPANTS: STUDENTS SEM I
VENUE: MCA B306
