

## Workshop on Docker and Kubernetes

Organized by  
The Department of MCA

**Date:** 31-05-2025

**Venue:** MCA Lab

### Brief Description of the Event

The workshop, "Docker and Kubernetes," offered a hands-on learning experience designed to equip MCA students with foundational and practical knowledge of modern DevOps practices. The session focused on how to containerize applications using Docker and deploy, manage, and scale them efficiently using Kubernetes.

### Topics Emphasized

- **Introduction to Docker**

The session began with a conceptual overview of Docker, explaining containers, images, and the benefits of containerization over traditional virtualization. Participants were introduced to Docker Architecture, installation, and core components like Docker Engine and Docker Hub.

- **Hands-on with Docker**

**Creating and Managing Containers:** Students learned how to write Dockerfiles, build images, run containers, and use commands like `docker ps`, `docker exec`, and `docker logs`.

**Networking and Volumes:** The session covered container networking models and data persistence using Docker volumes.

**Docker Compose:** Participants used `docker-compose` to define and run multi-container applications.

- **Introduction to Kubernetes**

A theoretical introduction to Kubernetes covered core components such as Pods, Nodes, ReplicaSets, Deployments, and Services. The discussion included the significance of orchestration in managing containerized

applications at scale.

- **Hands-on with Kubernetes**

- **Setting up a Local Cluster:** Students explored Minikube or Kubernetes on Docker Desktop for local testing.
- **Deploying Applications:** Participants learned to create YAML manifests for deployments and services.
- **Scaling and Updating:** The workshop demonstrated how to scale pods and roll out updates with zero downtime.
- **Monitoring and Logs:** Basic tools and commands like kubectl get, kubectl describe, and kubectl logs were explored to monitor cluster activity.

**Outcomes:** By the end of the session, students were able to

- Understand the architecture and workflow of Docker and Kubernetes.
- Containerize a simple application and manage it using Docker.

## **Activities Conducted**

- **Case Study and Practical Application:** To reinforce the concepts learned, the workshop concluded with a real-world case study that showcased how Docker and Kubernetes are used in industry settings for scalable application deployment.
- **Q&A and Discussion:** The workshop concluded with an interactive **Q&A and discussion session**, allowing participants to clarify doubts, share insights, and explore advanced use cases.
- **Clarifying Concepts:** Students asked questions related to container lifecycle management, differences between Docker Swarm and Kubernetes, and real-world deployment practices.

**Number of Participants:** 48

**Winners: (if any, for activities conducted):** NA

**Guest Details (Name, Designation, Organisation, Location) :**

Mr. Aravind Mohanraj

Cloud and DevOps Engineer, ANZ, Bengaluru

# Docker & Kubernetes

 31<sup>st</sup> May 2025

 10:00 AM - 01:00 PM

 MCA Lab B208

 2<sup>nd</sup> Semester Students

Faculty Coordinator

**Dr. Arpana Prasad**  
Associate Professor - MCA

Convenor

**Dr. Asha V**  
Professor & HoD - MCA

**Mr. Aravind Mohanraj**  
Cloud and DevOps Engineer, ANZ

# Feedback

## Quality of the training content

51 responses

## Clarity of the presentation.

51 responses

## Effectiveness of the examples depicted during the session.

51 responses

### Level of achievements of topics in learning Backend Development.

51 responses

### Rate the relevance of the topic to future study and work.

51 responses

## Attendance

WORKSHOP- DOCKER & KUBERNETES

DATED: 31-05-2025

DEPARTMENT OF MCA

ATTENDANCE SHEET OF PARTICIPANTS

WORKSHOP- DOCKER & KUBERNETES WORKSHOP

AY 2024-25

RESOURCE PERSON: Mr. Aravind Mohanraj

Cloud and DevOps Engineer, ANZ, BENGALURU

DATE: 31-05-2025

TIME: 10:00 am to 1:00 pm

PARTICIPANTS: STUDENTS SEM I

VENUE: MCA LAB-3
