REPORT ON INDUSTRIAL VISIT PROGRAMME

Date: 12 NOV, 2025.

Subject: Report On Industrial Visit To Zongovita.

Place: Zongovita, Vasantha Nagar, Bangalore.

No. of Students: 40

Introduction about Zongovita

ZongoVita transforms asset reliability and operational efficiency by seamlessly integrating AI and IoT across connected built environments. Designed for the era of smart factories and intelligent buildings, it delivers a real-time, granular view of asset performance, enabling truly predictive and prescriptive (RxM) maintenance. By moving organizations away from reactive processes, ZongoVita helps prevent failures before they happen—optimizing OPEX, CAPEX, and overall asset lifecycle management.

Its AI-driven ecosystem reduces downtime, defects, and costly repairs, resulting in higher productivity, improved energy efficiency, and significant cost savings. Built by experts in reliability engineering, energy management, and IoT, ZongoVita draws on decades of experience supporting mission-critical, large-scale operations. With its advanced technology and deep domain expertise, ZongoVita stands as a game-changer in modern asset management and operational excellence.

Objective

- *Understand AI and IoT in Asset Management* - Gain a solid understanding of how Artificial Intelligence (AI) and the Internet of Things (IoT) enhance asset reliability, system performance, and operational efficiency in modern smart environments.
- *Explore Predictive and Prescriptive (RxM) Maintenance Techniques* - Learn how industries are shifting from reactive to predictive and prescriptive maintenance, and discover how real-time data analysis helps anticipate and prevent equipment failures.

- *Analyze Industrial Applications of Smart Technologies* - Examine how AI-driven monitoring and advanced analytics improve OPEX, CAPEX, and overall operational excellence in large-scale, mission-critical environments.
- *Bridge the Gap Between Academia and Industry* - Explore practical, real-world use cases in IoT, reliability engineering, and energy management, equipping students with the knowledge and skills needed for emerging technologies and future career opportunities.

About the visit

The Department of Master of Computer Applications at New Horizon College of Engineering organized a student visit to Zongovita on November 12, 2025. A total of 40 first semester MCA students, accompanied by two faculty members, travelled by a college-provided bus for the full-day visit.

The journey commenced at 09:00 AM, reaching the destination by 11:00 AM. Upon arrival, Mr. Ravi, the CEO of ZongoVita Tech Private Limited, introduced the company and conducted interactive session to the students to the conference room. Later they had an insightful question-answer session with Mr. Sanjay, Founder of the company, in which the students got inspired by his optimistic and disciplined approach towards professional life where character and competence is given priority.

Outcome

- Students learned how AI-powered solutions enhance OPEX, CAPEX, and asset reliability, contributing to higher productivity, operational efficiency, and sustainable business growth.
- An engaging session with Mr. Ravi, CEO of ZongoVita, provided students with exposure to current industry practices, modern operational strategies, and real-world applications of smart technologies.
- Students gained meaningful insights into workplace ethics and corporate culture, strengthening their understanding of the professional values needed for long-term success.
- The interactive Q&A with Mr. Sanjay, Founder of ZongoVita, inspired students to cultivate discipline, optimism, and a forward-thinking mindset as they plan their career paths.
- Students also recognized the importance of integrity, continuous skill development, and professionalism, essential qualities for excelling in today's competitive industrial landscape.
