

ALUMNI TALK

on

“Simple Steps to UX Mastery”

Organised by
Department of MCA

Date: 13-12-2025

Venue: B308

Brief Description of the Event

The Department of MCA successfully organised an Alumni Talk on “Simple Steps to UX Mastery” to introduce students to the fundamental principles of User Experience design. The session focused on understanding user-centred thinking, effective design strategies, and industry best practices, helping students gain clarity on creating intuitive and impactful digital experiences.

Introduction of the Resource Person

Mr. Mohammed Yasin Harun is a Software Developer 3 at Oracle Cerner, Bengaluru. He has successfully taken on multiple responsibilities, conducted knowledge transfer (KT) sessions to upskill the team, and handled several critical and complex issues, bringing them to closure with high client satisfaction. He has consistently supported the Custom Reporting Team by resolving issues efficiently, eventually becoming the primary Subject Matter Expert (SME) for the team. In addition, he has worked extensively on multiple internal tools and email automations that are still in use, while also developing new solutions that provide valuable insights and reports to leadership, including the managerial level.

Content Delivery by the Resource Person

Mr. Mohammed Yasin Harun delivered an engaging and insightful session on “Simple Steps to UX Mastery”, focusing on the importance of user-centred design, structured UX processes, and real-world industry practices. The session highlighted how thoughtful UX design enhances usability, accessibility, and overall user satisfaction in digital products.

Key topics covered during the session included:

- Introduction to User Experience (UX) and its role in modern digital product development
- Understanding user behavior through research, personas, and empathy mapping
- Defining user requirements and aligning design goals with user needs
- UX design process: ideation, wireframing, prototyping, and usability evaluation
- Principles of usability, accessibility, and visual consistency

The session began with an overview of UX fundamentals, supported by short explanatory videos that demonstrated real-world UX examples and common design challenges. These

videos helped students visually understand how design decisions impact user interactions and overall experience.

Mr. Mohammed Yasin Harun explained how user research and requirement definition form the foundation of effective UX design, emphasising clarity and empathy in understanding user needs. He further showcased case-based videos illustrating best practices in navigation design, interface simplicity, and usability improvements.

The talk also highlighted the importance of cross-team collaboration, supported by industry-oriented videos that demonstrated the UX workflow from concept to implementation. The session concluded with guidance on UX career pathways and practical steps for students to begin developing UX skills, making the session both informative and engaging.

Interactive Session with the Students

The session concluded with an engaging Q&A segment, during which students actively participated by raising questions related to user research methods, usability challenges, design scalability, and real-world UX implementation strategies. The discussion fostered meaningful knowledge sharing and helped clarify core UX concepts, enabling students to gain a deeper understanding of designing intuitive, user-centred, and scalable user experiences.

Activities Conducted

The resource person actively engaged students through an interactive activity that involved analysing real-world UX scenarios. Students were guided to identify user needs, define design requirements, and discuss potential usability challenges. They were encouraged to think from a UX professional's perspective by proposing user-centred solutions, discussing design workflows, and considering collaboration between designers and developers. The session also included mentoring guidance, where he offered support to help students build relevant UX skills and enhance their overall career and placement readiness.

No. of Participants: 45

Winners (if any, for activities conducted): NA

Guest Details (Name, Designation, Organisation, Location):

Guest Name: Mr. Mohammed Yasin Harun

Position: Research Engineer - Software Developer 3 Oracle Cerner, Bengaluru
