

# NEW HORIZON COLLEGE OF ENGINEERING

## **Workshop on “Microservices for Beginners”**

Organised by

**Department of MCA**

**Date:** 29<sup>th</sup> November 2025

**Venue:** MCA Lab

### **Brief Description of the Event**

The workshop on Microservices for Beginners was conducted to introduce students to essential concepts of backend development and service-oriented architecture. The session provided MCA first-year students with hands-on experience in building console applications, developing REST APIs, and creating simple microservices using Python. It aimed to strengthen their understanding of modern backend workflows and equip them with practical skills required for building scalable and modular applications.

### **Topics Emphasised**

#### **Building Console Applications using Python**

Students were introduced to writing simple console-based programmes in Python to understand basic input–output operations and programme flow. This gave them a foundation before moving into API and microservice development.

#### **Developing REST APIs in Python**

The resource person demonstrated how REST APIs are created using Python frameworks such as Flask and FastAPI. Students learnt how to define endpoints, send requests, and view JSON responses, helping them understand real-time backend communication.

#### **Introduction to Microservices Architecture**

The session explained the concept of breaking applications into independent, loosely coupled services. Students understood how microservices improve scalability, maintainability, and deployment flexibility compared to monolithic applications.

## **Simple Microservice Project Implementation**

A small hands-on project was implemented where students built and tested a basic microservice in Python. This helped them connect the concepts of console logic, API development, and microservice integration in a practical manner.

### **Outcomes**

- Students gained hands-on experience in writing Python console programs.
- Understood how to design and expose REST API endpoints.
- Learned the structure, benefits, and workflow of microservices.
- Built and executed a simple microservice project integrating console logic.
- Understood real-time application flow from console app → API → microservice.

### **Activities Conducted**

- Demonstration of basic Python programs to build console apps.
- Live coding session on creating REST APIs using Python (Flask/FastAPI).
- Group Activity: Students tried with a simple service module and tested endpoints.
- Q&A, Interaction and clarification session with the resource person.
- Discussion on industry roles related to microservices architecture, backend engineering, API development, and cloud-native applications.

**No of Participants:** 56

**Winners:** (if any, for activities conducted): NA

**Guest Details:** (Name, Designation, Organisation, Location) :

Mr. Ankit Kumar  
Senior Member of Technical Staff  
Oracle Health, Bangalore

**Workshop**

# Microservices for Beginners

 **29<sup>th</sup> November 2025**

 **09:00 AM - 12:30 PM**

 **MCA Lab**

 **1<sup>st</sup> Semester MCA Students  
(Section C)**

**Mr. Ankit Kumar**  
Senior Member of Technical Staff  
Oracle Health, Bangalore

Faculty Coordinator  
**Dr. B Nithya Ramesh**  
Associate Professor - MCA

Convenor  
**Dr. V Asha**  
Professor & HoD - MCA

Organised by  
**Department of Master of Computer Applications**

## Photographs of the Event

## Feedback

### Quality of the training content

45 responses

### Clarity of the presentation.

45 responses

### Effectiveness of the examples depicted during the session.

45 responses

### Achievement level in understanding the topics

45 responses

### How relevant was the content of the session to your course or academic interests?

45 responses
