Autonomous College Permanently Affiliated to VTU, Approved by AICTE & UGC
Accredited by NAAC with 'A' Grade, Accredited by NBA

REPORT – GUEST TALK

DEPARTMENT OF MCA

(10th JANUARY 2026)

Topic: SQL Azure Database

Date: 10th December 2026

Timing: 10.00 AM-12 PM

Programme Co-ordinator:

Dr. Priya Thomas,
Associate Professor,
Department of MCA.

Convenor: Dr. V. Asha,

Professor & Head
Department of MCA.

No. of participants: 51 (I MCA)

Details of the Resource Persons:

Ms. Vijayalakshmi R Madrasi
Software Development Engineer
Cubic Logics India Pvt. Ltd., Bangalore.

Profile of the Expert:

Ms. Vijayalakshmi R Madrasi is a Software Development Engineer at Cubic Logics India Pvt. Ltd., Bengaluru, with expertise in application development, data structures, and modern web technologies. She holds an MCA from New Horizon College of Engineering and has hands-on experience in developing enterprise and web-based applications using React.js, Redux, Java, and related technologies. Her work includes UI development, API integration, performance optimization, and Agile-based development, supported by strong problem-solving and analytical skills.

Poster:

Objective:

The objective of the session is :

- To strengthen students understanding of relational database concepts and SQL taught in the DBMS syllabus through practical illustrations using Azure SQL Database.
- To familiarize students with the architecture, features, and advantages of Azure SQL Databases over traditional on-premise databases.
- To provide exposure to industry-oriented database environments while reinforcing foundational SQL knowledge covered in the curriculum.
- To bridge the gap between academic database concepts and industry practices through real-world use cases.
- To create awareness about career opportunities and skill requirements in cloud and database technologies.

Content:

The contents covered in the session includes the following:

- Overview of Azure SQL Database
- Architecture of Azure SQL Database
- Database and Table Concepts in Azure SQL
- SQL Operations in Azure SQL Database
- Security and Data Reliability in Azure SQL Database

Summary of Content:

The session provided an overview of Azure SQL Database, introducing students to its architecture and role as a cloud-based relational database service. It covered fundamental concepts related to database and table structures, basic SQL operations, and the importance of data security and reliability in Azure SQL Database. The talk helped students understand how traditional SQL concepts are applied in a modern cloud database environment.

Snapshot from the session:

Outcome:

The session helped students develop a clear understanding of Azure SQL Database as a cloud-based relational database system and its relevance to modern application development. By connecting theoretical SQL concepts from their DBMS syllabus with practical industry scenarios, students were able to better appreciate how databases are created, structured, and managed in a real-world environment. The discussion on SQL operations, data integrity, and security in Azure SQL Database enhanced their conceptual clarity and reinforced classroom learning. Overall, the session increased students' awareness of industry-relevant database technologies, improved their confidence in applying SQL concepts, and motivated them to explore advanced database and cloud-related topics in their future studies.
