

Industrial Visit

📅 18th December 2025

⌚ 12:00 PM to 04:50 PM

📍 UR Rao Satellite Center,
HAL Road, Bengaluru

Coordinators

Dr. Mithili Devi N
Associate Professor
MCA Dept, NHCE

Mrs. J Sathya
Sr. Assistant Professor
MCA Dept, NHCE

Convenor

Dr. V Asha
Professor & HoD,
MCA Department, NHCE

Organised by

Department of Master of Computer Applications

Autonomous College Permanently Affiliated to VTU, Approved by AICTE & UGC
Accredited by NAAC with 'A' Grade, Accredited by NBA
New Horizon Knowledge Park, Ring Road, Bellandur Post, Bengaluru 560 103

Department of MCA

REPORT ON INDUSTRIAL VISIT TO ISRO

Date: 19th December 2025

Time: 12:00 pm to 04:50 pm

Class: I SEM

No of students: 120

Objective:

- To help students understand the various research opportunities available at ISRO.
- To create awareness about space technology and its diverse applications.
- To familiarize students with job and internship opportunities at ISRO.
- To provide students with insights into the internal functioning of a research organization.
- To enhance students' knowledge of advanced and emerging technologies.

About Industrial Visit:

On 18th December 2025, the Department of MCA organized an industrial visit to ISRO with the objective of enhancing students' knowledge of advanced technologies and their applications. The half-day visit was attended by approximately 120 students, accompanied by three faculty members.

The visit took place at the U. R. Rao Satellite Centre (URSC), a premier ISRO center responsible for the design, development, assembly, and integration of communication, navigation, and remote sensing satellites. ISRO actively encourages student engagement by creating awareness about space technology and its wide-ranging applications.

As part of the visit, students explored the Space Exhibition Centre at URSC, which showcased models of historic satellites such as Aryabhata, APPLE, and the INSAT series. The exhibition highlighted two major categories of satellites—remote sensing and communication satellites—and emphasized IRS-1A, India's first remote sensing mission.

Students observed various satellite models, ranging from early designs like the APPLE satellite to advanced satellites equipped with solar panels, solar sails, and onboard thrusters used for orbital adjustments. Explanations were provided on the use of gold-coated surfaces for thermal control and aluminum honeycomb structures for lightweight and strength. A glimpse of the clean room, where satellite assembly takes place, was also provided.

The satellite assembly process was further explained through a video presentation. Scientists' work on Chandrayaan-3 was highlighted through a detailed video showcasing the lunar mission and its working model. Students viewed satellite images of different countries taken from multiple angles and learned about various electronic components used in satellites. An interactive segment helped students understand variations in body weight across different celestial bodies such as the Moon, Mars, and Earth.

Towards the end of the visit, the mentor addressed students' questions related to satellite launching and communication systems, including television signal transmission through satellites. Guidance was also provided on career paths, job opportunities, and the selection process for working at ISRO. Overall, the visit proved to be an informative and inspiring learning experience for the students.

Outcome:

- Students gained knowledge about the various electronic components used in satellite systems.
- They developed an understanding of different types of satellites and their applications across multiple domains.
- Students became aware of ISRO's upcoming and ongoing space missions and projects.
- They learned about the job roles, internship options, and research opportunities available at ISRO.
- Students realized the importance of staying updated with the latest technological advancements.

Photos of the visit

Feedback Form

Timestamp	Email Address	Name (Type your name in CAPS)	Section	How would you rate your overall experience of the ISRO industrial visit?	Did the visit help you understand space and technology?	Did the visit help you understand career and research opportunities at ISRO?	Any other Comments?
