

NEW HORIZON COLLEGE OF ENGINEERING

WORKSHOP ON “BUILDING RELIABLE AND SCALABLE SYSTEMS WITH DEVOPS”

**Organized by Department of MCA in association with CSI
& Automatez**

DATE: 13th December 2025

VENUE: MCA Lab

NO. OF PARTICIPANTS: 45

BRIEF DESCRIPTION OF THE EVENT:

The Department of MCA in association with CSI & Automatez successfully organized the Workshop on “Building Reliable and Scalable Systems with Devops” aimed to introduce participants to DevOps principles and practices for building reliable and scalable systems. It focuses on understanding automation, continuous integration, and deployment strategies to improve system performance and availability. The session also aims to bridge development and operations for efficient and resilient software delivery.

Introduction of the Resource Person

Mr. Prathith is a DevOps Engineer with industry experience at Tata Consultancy Services (TCS), specializing in cloud migration and CI/CD automation. He has hands-on expertise in DevOps tools such as AWS, Docker, Kubernetes, Jenkins, and Ansible, with experience in building end-to-end DevSecOps pipelines. He is also a postgraduate in Computer Applications and an IEEE research paper author, bringing both practical and academic insights to the session.

Content Delivery by the Resource Person

The resource person began the session with a detailed introduction to DevOps, explaining its evolution and importance in bridging the gap between development and operations teams. He emphasized the need for DevOps in achieving faster software delivery, improved reliability, and efficient scalability of applications. The session highlighted how DevOps practices are effectively applied across various domains such as cloud computing, web applications, and enterprise systems. He then introduced a DevOps tool used for code hosting and integration, explaining how code is stored, managed, and automatically deployed through pipelines. Finally, he provided an in-depth explanation of Kubernetes, covering container orchestration, deployment strategies, load balancing, and auto-scaling of applications.

Interactive Session with Students

The resource person engaged students through an interactive question-and-answer session, asking basic questions related to DevOps concepts. Students actively responded and shared their views on the applications of DevOps and its use in real-time scenarios. He also discussed practical industry use cases to enhance their understanding. Additionally, beyond the session topic, he guided students by sharing useful resources and preparation tips to support their placement readiness.

ACTIVITIES CONDUCTED:

An interactive question-and-answer session was conducted to assess students' understanding of DevOps concepts and real-time applications. Students actively participated by responding to questions and engaging in discussions throughout the session.

WINNERS (if any, for activities conducted): NA

GUEST DETAILS (Name, Designation, Organisation, Location):

Mr. Prathith

DevOps Engineer

TCS, Bangalore, Karnataka.
