

# NEW HORIZON COLLEGE OF ENGINEERING

## EXPERT TALK ON “BUILDING PRODUCTION - READY APPLICATIONS WITH FLASK”

**Organised by the Department of MCA**

**Date:** 24th January 2026

**Venue:** B 308

### **Brief Description of the Event**

The Department of MCA successfully organised the Expert Talk on “Building Production–Ready Applications with Flask” aimed to provide students with practical insights into developing scalable and deployable web applications using the Flask framework. The session focused on the transition from basic Flask applications to production-level systems by emphasising best practices in application structure, security, and deployment. The resource person explained key concepts such as environment configuration, database integration, and API development with real-world examples. Students also gained an understanding of testing, debugging, and optimising Flask applications for performance and reliability. The talk was highly informative and helped participants appreciate how Flask can be effectively used to build industry-ready web solutions.

### **Introduction of the Resource Person**

Mr. Karan S Jadhav has demonstrated outstanding academic and professional achievements by qualifying UGC-NET 2023, GATE 2024, and securing 13th rank in KSET 2023, reflecting strong subject mastery in computer science. With an MCA CGPA of 9.42 and consistent academic excellence, he has actively contributed to research-driven projects in Generative AI, medical image processing, and IoT systems. His involvement as a coding event coordinator, success in technical competitions, and experience in mentoring and volunteering highlight his leadership, communication skills, and commitment to academia.

### **Content Delivery by Resource Person**

This Expert Talk on Flask focuses on introducing participants to Flask as a lightweight, flexible, and powerful Python web framework used for developing modern web applications.

The session covers core concepts such as application structure, routing, request–response handling, templates, and integration with databases. Emphasis is placed on understanding how

Flask simplifies backend development while allowing developers full control over application design. Real-world examples are used to demonstrate how Flask is applied in academic projects and industry use cases.

The talk also highlights best practices in building scalable and secure applications, including project organisation, use of extensions, and basic deployment strategies. Participants gain practical insights into how Flask can be used for internships, research projects, and production-ready applications. The session aims to motivate learners to explore backend development with Python and build confidence in creating functional web applications.

Key topics covered are:

- Introduction to Flask Framework and its role in modern web application development
- Structuring Flask applications for production-ready deployment
- Database integration and handling data using Flask extensions
- Security practices and configuration management in Flask applications
- Testing, debugging, and deployment strategies for scalable Flask applications

The session explained routing in a clear, step-by-step manner, helping students understand how URLs are mapped to functions and how data flows between the client and server. Production concepts were introduced by demonstrating environment setup, configuration handling, and deployment readiness. Students were also guided through writing and executing complex SQL queries, focusing on joins, subqueries, and optimisation. Practical examples helped students connect routing logic with database interactions, improving overall backend development understanding.

## **Interactive Sessions with Students**

The session concluded with an engaging Q&A session, providing students the opportunity to ask questions, clarify their doubts, and share their insights. Karan S Jadhav encouraged active participation, enabling the students to gain a deeper and more comprehensive understanding of the subject matter.

## **Activities Conducted**

During the Q&A session, Karan S Jadhav posed thought-provoking questions to the audience, encouraged them to share their perspectives, and provided insightful answers to their queries.

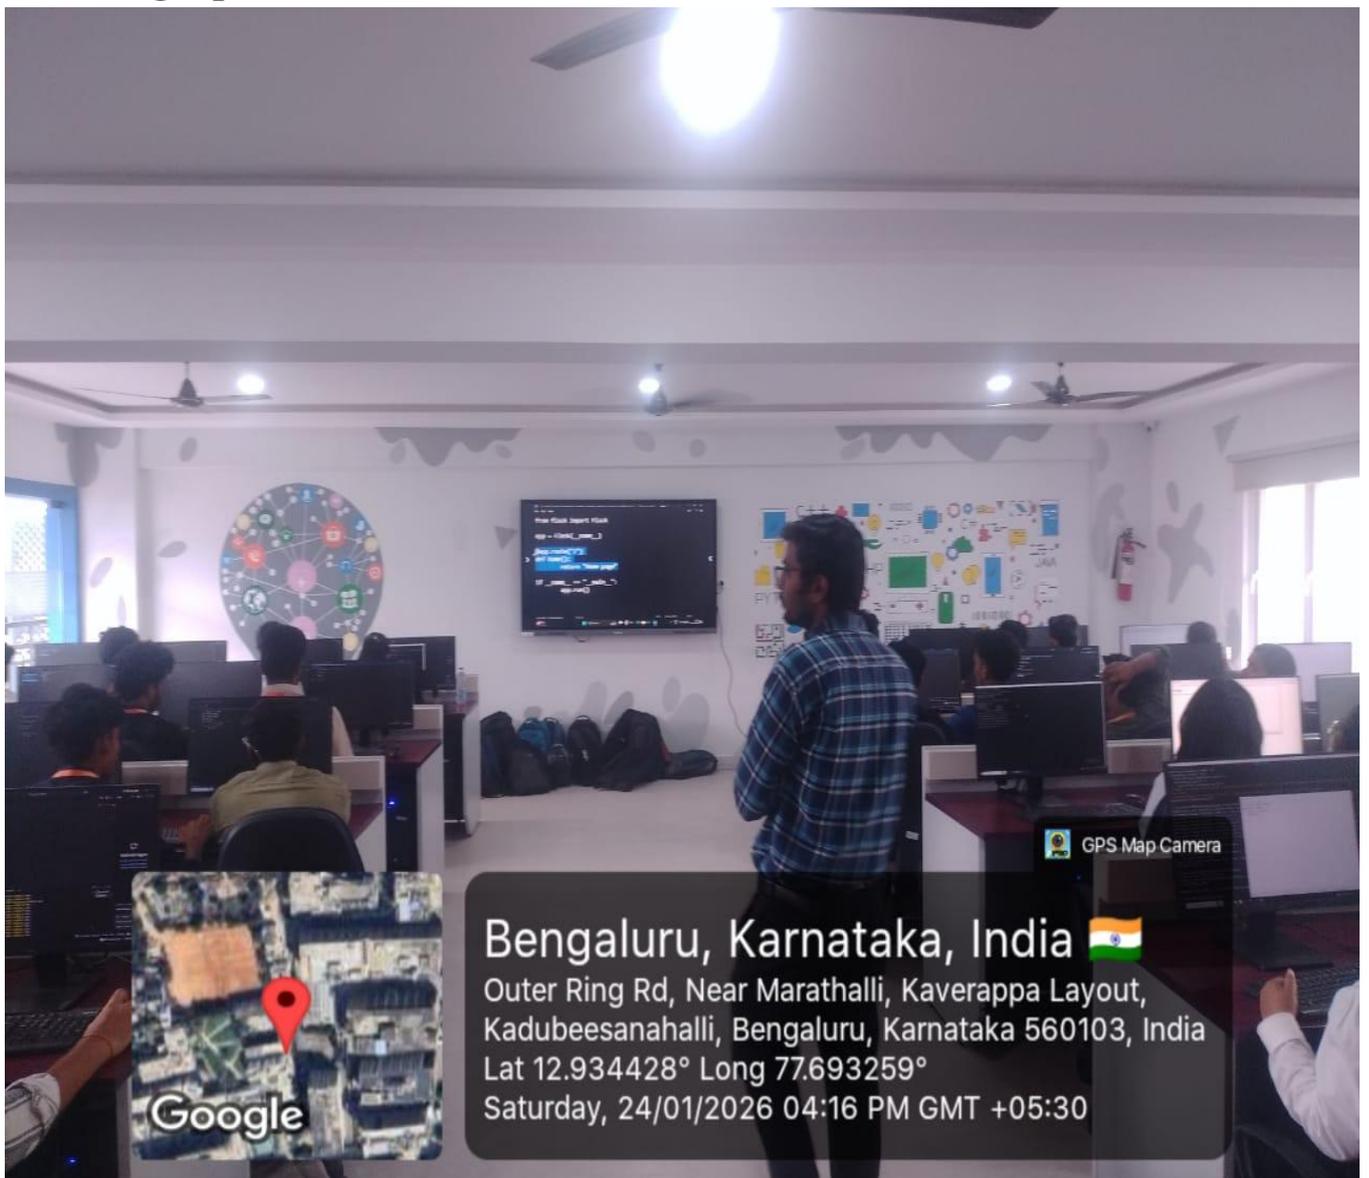

**No of Participants:** 54

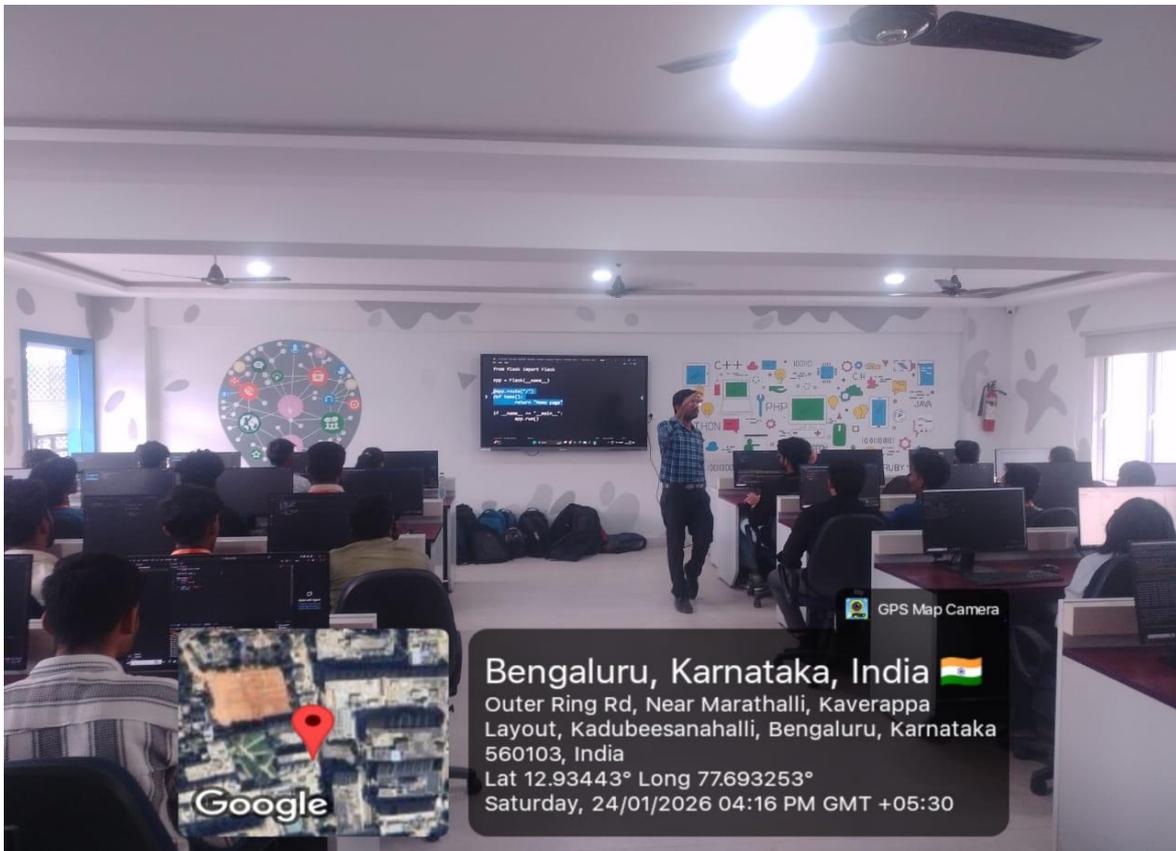

**Winners:** (if any, for activities conducted): NA

**Guest Details:** (Name, Designation, Organisation, Location) :

Mr. Karan S Jadav  
Sr Software Developer  
Riversilica Technologies Pvt Ltd, Bangalore.
